

G-Cloud 15 Service Description

AWS Cloud Migration Services

AWS Cloud Migration Services

Methods expedite cloud migration by assessing current architecture, designing target states aligned with AWS WAF, and crafting transition plans. We prioritise your business context, minimising service disruptions during implementation, while offering ongoing support. We can apply our model to any workload such as Windows, Linux, COTS and bespoke software.

What is the Service

Methods can accelerate your cloud migration activities. We use our proven, repeatable approach to move workloads into AWS from legacy hosting or other clouds. We assess and document your current architecture through discovery, design the target state in accordance with AWS WAF, design the transition states and delivery pipeline, and provide the implementation and support. We will work with you to provide a transition plan to undergo the migration, taking into consideration your business context such as key milestones, dates and other business change activity to minimise the impact to your services.

What can it do for you

Methods will use an AWS outcome-driven methodology to accelerate your cloud migration whilst increasing efficiency and reducing risk. We will use an agile migration process to assess, migrate and modernise your workloads. We will optimise the AWS resources for your workload and optimise your licensing for any kind of workload including Windows, Linux, COTS and bespoke applications.

Service Features

- 1. Current workload assessment
- 2. Target state architecture
- 3. Transition states
- 4. Transition planning
- 5. Cultural alignment

Service Benefits

- 1. Accelerated migration
- 2. Reduced risk
- 3. Modernised applications
- 4. Lower TCO
- 5. Repeatable process

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
