

G-Cloud 15 Service Description

Microsoft Fabric Implementation

Microsoft Fabric Implementation

Our certified team provide end-to-end implementation of Microsoft Fabric, designed to streamline and enhance data integration, management, and analytics capabilities for your organisation using Microsoft's all-in-one analytics solution for enterprises.

What is the Service

Our Microsoft Fabric Implementation service guides organisations through a series of structured stages designed to facilitate successful adoption.

Starting with an educational phase where your team learns the strategic and tactical aspects of Fabric through a series of workshops, the service progresses to assessing the current state of your data practices. We then help you clarify strategic goals related to Microsoft Fabric adoption, ensuring they align with broader organisational objectives.

The service prioritises initiatives based on potential impact, defines measurable objectives, and creates detailed tactical plans to guide your journey. Each step is designed to enhance your understanding, streamline processes, and foster a data-centric culture.

We handle the setup, migration, and integration of existing data systems into Microsoft Fabric, ensuring a seamless transition and minimal operational disruption. Our approach includes rigorous security protocols to protect sensitive information in accordance with government regulations.

Additionally, we offer comprehensive training for staff and continuous support to adapt to evolving needs, maintaining optimal system performance and leveraging Microsoft's continuous updates for enhanced functionalities.

What can it do for you

Our service empowers public sector organisations to centralise and secure their data landscapes, leverage advanced AI and machine learning capabilities, and automate processes, leading to significant improvements in efficiency, data insights, and decision-making processes.

Service Features

1. Conducts Discovery workshops to design implementation and adoption strategy
2. Assesses and optimises tenant configurations for Microsoft Fabric
3. Configures admin settings for optimal management and operation
4. Evaluates and selects cost-effective capacity SKUs for workloads
5. Implements usage monitoring for performance optimisation
6. Structures workspaces to support effective release and operation models
7. Aligns domain structures with business functions for better data management
8. Integrates Microsoft Purview for enhanced security and compliance
9. Roll-out Microsoft Fabric with a focus on effective user onboarding
10. Develops end-to-end templates for use cases, from ingestion to reporting

Service Benefits

1. Single platform for data science, machine learning, AI, and BI
2. Empowers data citizens, engineers, scientists, and stewards to perform
3. Simplifies the architecture across data engineering, data science, and BI
4. Reduces the cost and complexity of managing data and analytics
5. Accelerates the delivery of ROI through self-service analytics
6. Fosters a new level of data innovation with generative AI and open standards
7. Ensures compliance with rigorous data governance standards
8. Provides scalable solutions to accommodate organisational growth
9. Offers extensive training and support for optimal platform use
10. Drives operational efficiency with adaptable data management solutions

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

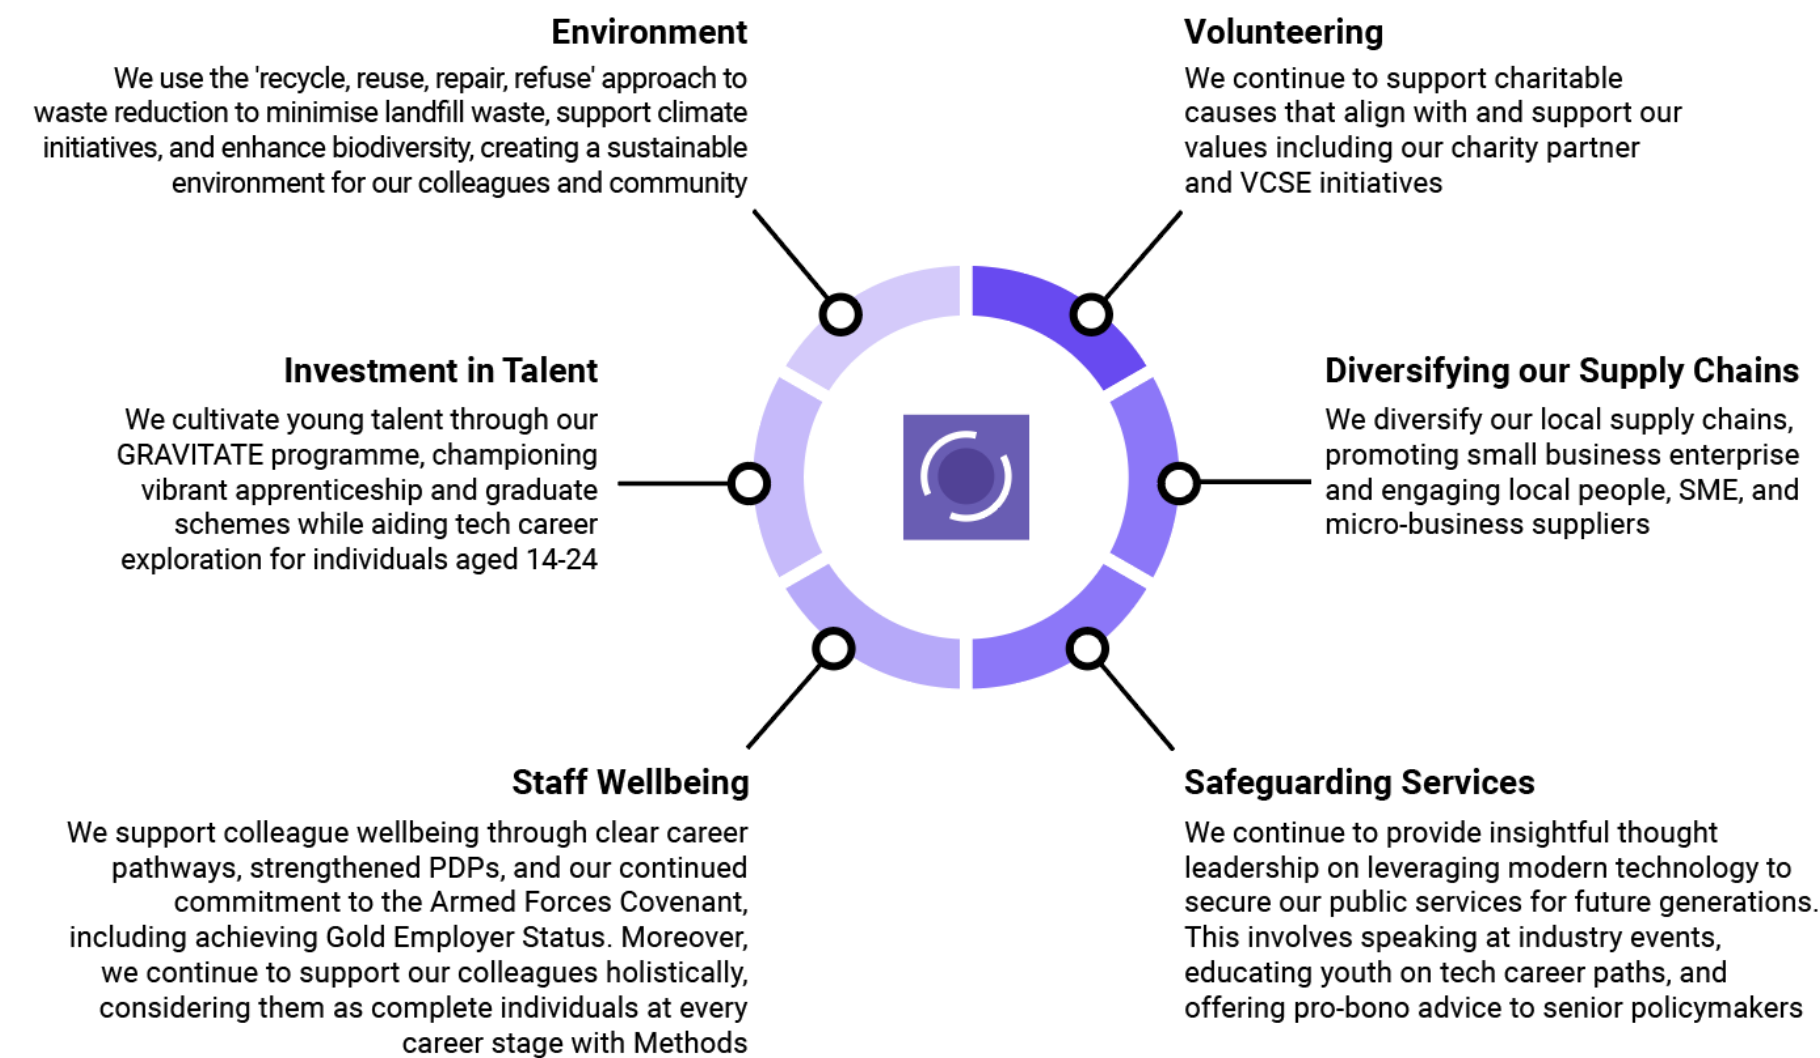

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
