

G-Cloud 15 Service Description

Microsoft Azure Enterprise Mobility and Security Services

Service description details

Microsoft Azure Enterprise Mobility and Security Services

Our Enterprise Mobility services facilitates secure remote working and working from anywhere, and the ease at which people can access systems and data, allowing the secure use of personal laptops and mobile devices for business purposes and make use of cloud technology for data access.

What is the Service

Methods offer a complete range of services that leverage the Microsoft Cloud Platform Azure to provide systemic and complete employee and user Enterprise Mobility. The services includes:

- Azure Virtual Desktop (AVD) remote access capabilities including access to high demand GPU applications
- Multifactor Authentication (MFA) including conditional access policies
- Single Sign On (SSO) to all Applications including assessing application for SAML authentication and deployment of M365 apps
- Packaging and Deployment of Applications from Intune
- Endpoint Protection, including the update of Microsoft Baseline Policies in Intune Endpoint Protection
- Upgrade of Windows Devices
- Device Compliance and Health Inventory
- Migration of shared drives to SharePoint/OneDrive/Teams (Cloud)
- Review SharePoint Online configuration including sharing policy and related settings
- Review Microsoft Teams configuration, including Guest and External Access
- Review Microsoft Teams & SharePoint Online Governance
- Review and implement OneDrive for Business configuration including Group Policy
- Review Power Platform Governance
- Email Security & File Security – Defender for Office 365 (Exchange Online, Teams, SharePoint, OneDrive), including policy settings
- Information Classification & Protection to ensure all confidential data is shared and stored according to the compliance requirement
- Data Loss Prevention to protect against accidental sharing of GDPR (General Data Protection Regulation), and Confidential data externally
- Self Service Password Reset (SSPR)
- Conditional Access to provide access control based on specific conditions and actions
- Identity Protection.

What can it do for you

The service provides our customers with a secure and seamless user experience across Cloud resources, Data, Applications and Systems benefiting from centralised management of Systems, Applications and Data with granular reporting tools readily available as well as keeping all Applications and Systems up to date with automated patching throughout their lifecycle.

Safe and Secure Enterprise Mobility including MFA enhances the accessibility to key systems and data regardless of point of access and connection type. It forms an effective response to the demands of cyber essentials accreditation and the increased information security threat associated with greatly enhanced accessibility by implementing a range of integrated native cloud security capabilities.

The real value of EM is in providing a systemic solution to increase the Enterprise Mobility of our employees but in a safe and secure way that protects organisations from the ever increasing cyber security risk. Introducing these capabilities in a piece-meal and tactical fashion will fail to deliver a full range of benefits.

Service Features

1. Anywhere and anytime remote access to Applications, Systems and Data
2. Secure working platform for end users and endpoint protection
3. Cloud-based Centralised Management and support of Devices, Data and Application
4. Information and identity protection e.g. DLP and conditional access
5. Providing Seamless Single Sign on (SSO) capabilities for all applications
6. Unlimited Storage and backup capabilities within the cloud
7. Visibility, Health, Monitoring, and reporting capabilities for all assets
8. Leveraging native Microsoft capabilities across Microsoft Tenant
9. Minimises Infrastructure dependencies for SaaS and PaaS based solutions
10. Enterprise mobility readiness assessments

Service Benefits

1. Support flexible working by making IT, systems, data available on-line
2. Provide improved access to systems and data
3. Organising our information better to aid information retrieval
4. Enable seamless and structured access to important information assets
5. Reduce the need for on-premise data storage
6. Strengthen governance of our MS365 environment including Email and SharePoint
7. Centralise the configuration and administration of device security
8. Enhance collaboration and making the experience more consistent
9. Enhancing security measures, such as preventing data loss
10. Complying with cyber security standards and other stringent regulatory requirements

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting** overall **service reliability, efficiency, and organisational visibility**.

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability**. Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
