

G-Cloud 15 Service Description

Digital Technology Transformation

Digital Technology Transformation

We unlock the potential of Public Cloud Infrastructure, including IaaS, SaaS and PaaS. We recognise the importance of ‘cloud-first’ principles in enabling organisations reconfigure around their service users, leverage data to improve the front-line experience, share common business processes, and reduce costs by moving away from legacy IT delivery techniques.

What is the Service

We specialise in providing services to support the transformation of Cloud-based technology across several different architectural patterns, from Cloud only to full hybrid environments connecting the Cloud to legacy technology investments in AWS, Azure and Google Cloud.

What can it do for you

Traditional, paper-based solutions are rapidly being replaced by solutions that fully leverage the opportunities of cloud and digital technologies. Digital transformation can provide cost savings and open new avenues to create vast improvements in the way that your organisation delivers value.

Service Features

- 1. Strategic alignment between Digital capability and business need
- 2. Cloud enabled end to end service transformation
- 3. Digital Roadmaps for change and improvement
- 4. Rationalisation and optimisation of application estates
- 5. End to end business process improvement
- 6. Agile delivery methods
- 7. Enabling mobility, agility, security, financial transparency and cost-effectiveness of services
- 8. Improved management of information risk
- 9. Continuous integration and continuous delivery (containerisation)
- 10. Contract disaggregation

Service Benefits

- 1. Genuine and sustainable business transformation
- 2. Improved data usage to deliver better front-line services
- 3. Reduce cost of IT supply, greater transparency and price flexibility
- 4. Improved organisational efficiency – a more agile enterprise
- 5. Improved user experience and empowerment

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
