

G-Cloud 15 Service Description

Service Improvement Process Waste Analysis

Service Improvement Process Waste Analysis

Methods help clients create Lean approaches and cultures, removing anything that doesn't add value for the customer. Our Waste Analysis service helps you to identify, quantify, eliminate and prevent waste in manufacturing, service and office environments.

What is the Service

Methods believe problems are a normal part of business and should be viewed as a learning opportunity. Process waste analysis involves identifying, quantifying, eliminating and preventing wastes which can lead to poor productivity and over processing. The key is identifying the changes in mindsets, behaviours and capabilities needed to embed a culture of continuous improvement.

What can it do for you

Methods will support you in enabling strategic decision making by identifying the highest priority transformation levers. We'll work together to build the 'case for change' based on data, factual evidence and process insight and provide a fresh perspective to understand and quantify process performance.

Service Features

- 1. Define the problem
- 2. Understand the cause
- 3. Measure the impact
- 4. Analyse the data
- 5. Improve the service
- 6. Sustain the solution
- 7. Control the results

Service Benefits

- 1. Reduce waste
- 2. Increase efficiency
- 3. Reduce errors
- 4. Improved service & responsiveness
- 5. Reduced risk
- 6. Improved Quality

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability**. Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
