

G-Cloud 15 Service Description

Enterprise Analytics Design, Build and Run with Power BI

Enterprise Analytics Design, Build and Run with Power BI

We provide comprehensive design, development, and operational support for enterprise analytics solutions using Microsoft Power BI, incorporating the latest trends in enterprise analytics and delivered within an agile, user-centred framework. It ensures organisations benefit from advanced data connectivity, AI enhancements, and robust data governance capabilities.

What is the Service

Leveraging Microsoft Power BI, our service encompasses the entire lifecycle of analytics solutions from initial design through agile development to ongoing maintenance. This includes setting up scalable data models, integrating AI for predictive analytics, and using Power BI's latest features like dynamic subscriptions and improved data protection measures.

Our approach is user-centred, focusing on creating intuitive, interactive reports and dashboards that meet the specific needs of different stakeholders within your organisation. Bring your data to life with the analysis and reporting your users need to make better decisions.

What can it do for you

Our service enables your organisation to harness the full potential of Power BI to transform data into actionable insights.

By employing the latest Power BI features, such as AI-driven visuals and enhanced security options, your organisation can improve decision-making processes, enhance data storytelling, and maintain compliance with industry standards.

Additionally, our agile development process ensures that the analytics solutions evolve with your organisation's needs, providing flexibility and scalability.

Service Features

1. Design and implementation using the latest Power BI updates
2. Agile development processes for rapid delivery and iteration
3. User-centred design principles to enhance user experience
4. Integration of Power BI with existing systems and data sources
5. Advanced data modelling and AI predictive analytics
6. Dynamic and automated BI report subscriptions
7. Enhanced data protection and governance with Power BI
8. Customised training and support for all user levels
9. Continuous performance monitoring and solution optimisation
10. Strategic insights through advanced data analytics capabilities

Service Benefits

1. Transforms complex data into clear, actionable insights
2. Quickly adapts to changes with agile methodology
3. Ensures solutions meet actual user needs and preferences
4. Integrates seamlessly with multiple data sources and platforms
5. Leverages AI for accurate forecasting and trend analysis
6. Automates reporting, saving time and resources
7. Strengthens data security and compliance measures
8. Empowers users with tailored training and support
9. Maintains optimal performance with ongoing adjustments
10. Supports strategic decision-making with deep analytics insights

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation

Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation

Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)

Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement

Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)

Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)

Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
