

G-Cloud 15 Service Description

FinOps

FinOps

Methods will assess and document your cloud workloads and delivery cultures including cloud architecture, licensing, delivery model, efficiency and cloud consumption. Methods’ report will provide recommendations for re-architecture of the product and delivery pipeline to use cloud-native technologies, DevOps cultures and automation, minimising TCO and maximising efficiency.

What is the Service

Methods can help you assess your cloud workloads and provide documented reports to either support or improve your cost efficiency. We will assess architecture of the product including its cloud architecture, licensing, delivery model and efficiency and cloud consumption. We will look at the value derived from a product and its delivery.

Methods will provide a report that provides recommendations for re-architecture of the product or its delivery pipeline to use cloud-native technologies, DevOps cultures and automated pipelines, and return-on-investment efficiency through cadence improvements to ensure the minimum TCO and maximal efficiency.

Methods can help transform your business culture to one cloud native first architectures and continuous improvement.

What can it do for you

Methods will improve the efficiency of your cloud consumption and embed a culture of continuous improvement that periodically re-assesses technologies and landscape to ensure the minimum TCO and maximum delivery cadence and quality.

Service Features

- 1. Well-Architected Reviews
- 2. Cloud Cost Analysis
- 3. DevOps Maturity Assessment

Service Benefits

- 1. Help you minimise cloud costs
- 2. Help you create a culture of continuous improvement
- 3. Help you improve DevOps maturity
- 4. Help you understand cloud costs through analysis

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
