Data Analytics for Local Government workshop

Data Analytics for Local Government workshop

Our workshop provides an introduction to how population health management and data analytics can support achieving more with less. We deliver an interactive workshop that engages staff in cross-departmental collaboration to develop data-driven solutions to local problems. Outputs are developed into business cases or the design of transformation programmes.

What is the Service

The landscape of health and social care is changing with the emergence of integrated care systems (ICSs) in localities. Organisations have access to more data than ever before but often operate with limited information or insight in addressing system wide challenges. Data is an asset that can used to deliver better, more efficient services that reduce costs across a locality, in partnership with other provider organisations.

Our workshop is specifically designed to provide you with an introduction to population health management, and the way in which data and analytics can be designed and utilised to help solve the big challenges in health and social care.

What can it do for you

We will engage your staff in a fast paced, executive education style workshop that will generate ideas for what the future of population health management could be, prioritising potential solutions through data and analytics that can be developed into a business case or change and transformation programmes.

Service Features

- 1. Interactive workshop for idea generation
- 2. Population Health analytics, derived from local data
- 3. Learning from a leading population health data analytics expert
- 4. Insight in to how local data can improve local outcomes
- 5. Outline business case for top ranked idea

Service Benefits

- 1. Understand how data can completely transform service delivery
- 2. Get services working together to create inventive solutions
- 3. Generate a large amount of ideas in a short period
- 4. An outline business plan for the top rated idea
- 5. Real world data visualisations of local datasets

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
