

Center of Excellence for Power Platform

Microsoft Industry Solutions Delivery

Why it matters?

The state of today's market is rapidly changing. Those who embrace digital transformation can be rewarded by generating on average \$100 million more income each year. These organizations understand that the importance of favorable customer experiences is rising, and in turn, the challenges to worker productivity are growing.

By adopting the Microsoft Power Platform, organizations can harness the power of digital transformation to engage their customers, empower their employees, transform their products, and optimize operations. With this Industry Innovation with Power Platform offering, organizations can accelerate their transformation journey

Outcomes
