Capabilities

The 30-day Microsoft 365 Copilot + Copilot Chat Rapid Deployment engagement will focus on supporting you in establishing the business value and adoption baseline for the smooth enablement of Copilot through your environment. We will assist you with readying your end users and delivering an adoption campaign to drive benefit from usage for up to 1000 Microsoft 365 Copilot and Copilot Chat users.

Build, Test, and Learn Partner with us to uncover priority scenarios and uses cases and learn from them to assist you in designing and testing first wave adoption activities.

Assess and Guide We will assess your user environment for Copilot adoption readiness and provide you guidance on how best to drive adoption.

Adoption Support We will provide adoption oversight and guidance during your campaign and support you with your first wave of user onboarding.

Duration:
30 Days

Not sure if you need Copilot for M365 Rapid Deployment?

This offer should be targeted at customers identified by ISD as candidates for Microsoft M365 Copilot. Outside of that target list, this offer can be targeted at customers with the following attributes:

- Customers that require assistance that goes beyond what FastTrack, or the CSU (Customer Success Unit/Unified) can offer
- Customers that want to move fast
- Customers that are just beginning their Copilot journey
- Customers that are not fully committed to Copilot

Next Steps Talk with your Microsoft representative and schedule a meeting to discuss how Microsoft can help you leverage the transformational capabilities of Copilot for M365.
