

Security Copilot Advanced Integration

Modernize your Security Operations Center with GenAI

Why it matters?

Cybercriminals are leveraging advanced tools like GenAI to enhance social engineering, develop malware, exploit vulnerabilities, and outpace defenders in the rapidly evolving cybercrime economy. Traditional SOC tools lack the visibility and efficiency to keep pace with emerging threats, leaving teams overwhelmed and attackers undetected.

Build the SOC of the future by implementing a unified, AI-driven security operations model where humans and AI work together to protect the organization proactively and efficiently – this solution delivers

- Security Copilot Enablement
- Implementation of customer-specific high-priority Security Copilot use cases

Outcomes

Faster Incident Response

respond faster to incidents by automating tasks involved in identifying, investigating and remediating security incidents

Increased operational

efficiency and save costs
Automate repetitive security tasks and data analysis

Accelerated Threat Detection

AI driven analysis reduces mean time to detect

Strengthened Security Posture

shift the organization to a proactive security posture by identifying threats and vulnerabilities early

Transform Security Operations leveraging Security Copilot and AI

Capabilities and Offer Overview

This offer focuses on enabling Security Copilot and providing value by implementing customer-specific AI use cases with deep integration into the existing SOC tools and processes leveraging Logic App, 3rd party plugins, custom plugins and custom promptbooks as required. It is available in three different sizes..

Packages	Duration	Price
Small Education and use case discovery workshop Security Copilot Enablement Implementation of 2* high-priority use cases	~ 5 weeks	~87K USD
Medium Small package + Implementation of 2* high-priority use cases	~ 7 weeks	~123K USD
Large Medium package + Implementation of 4* high-priority use cases	~ 11 weeks	~198K USD

Scope

Benefits

Faster Incident Response & Mitigation

Strengthened Security Posture & Risk Management

Accelerated Threat Detection & Proactive Defense

Operational Efficiency & Cost Savings

Why Security Copilot?

Catch what others miss

Threat signals and security alerts create noise that conceal attackers

Security Copilot enables teams to reason over real-time threat signals and their enterprise data to cut through the noise, detect threats before they cause harm, and reinforce security posture.

Outpace adversaries

During security incidents, every minute counts.

Security Copilot puts critical guidance and context at security teams' fingertips so they can respond to incidents in minutes instead of hours or days.

Strengthen team expertise

Security teams must continuously elevate their expertise to stay ahead in an evolving threat landscape.

Security Copilot enables junior staff to perform more advanced capabilities and redirects expert staff to the hardest challenges, thus elevating the proficiency of the entire team.

Next steps

Now is the time to modernize your SOC. Get started today and discover how Microsoft Industry Solutions offerings can help business grow using Security Copilot
