

Data Security and Compliance for Microsoft 365

Enhance your data security and compliance posture for Microsoft 365 and Copilot

Why it matters?

In today's digital landscape, safeguarding sensitive data and ensuring compliance with regulatory standards are paramount, especially with the emergence of industry-leading generative AI solutions like Microsoft 365 Copilot. Microsoft 365's robust security and compliance solutions help organizations protect their data, reduce and mitigate risks, and improve compliance at scale.

Transform your data security and compliance, including that consumed and produced by Microsoft 365 Copilot, by working with Microsoft Industry Solutions to:

- Assess and remediate high priority Microsoft 365 data security and governance risks.
- Plan for, configure and scale Microsoft 365 Purview solutions for data security, governance and compliance.
- Plan for ongoing governance, optimization, support and operations.

Outcomes

Enhanced Data Security

Strengthen protection against data breaches and unauthorized access.

Streamlined Compliance

Simplify adherence to standards and industry requirements.

Optimized Governance

Improve data management and oversight across your organization.

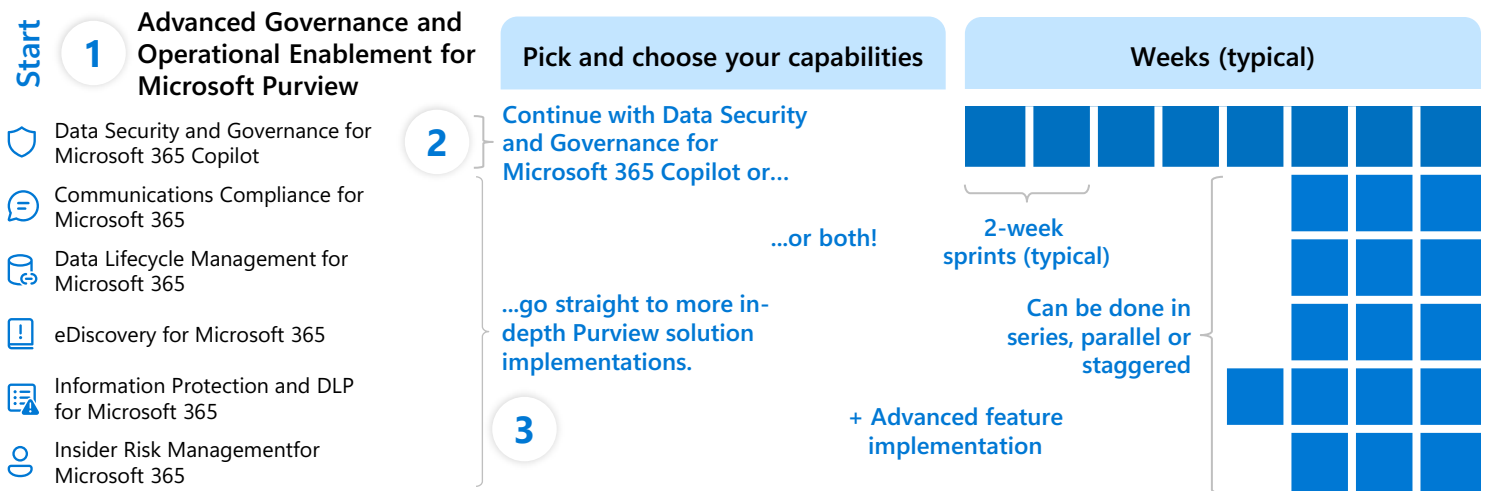

Increased Efficiency

Boost productivity with automated security and compliance processes.

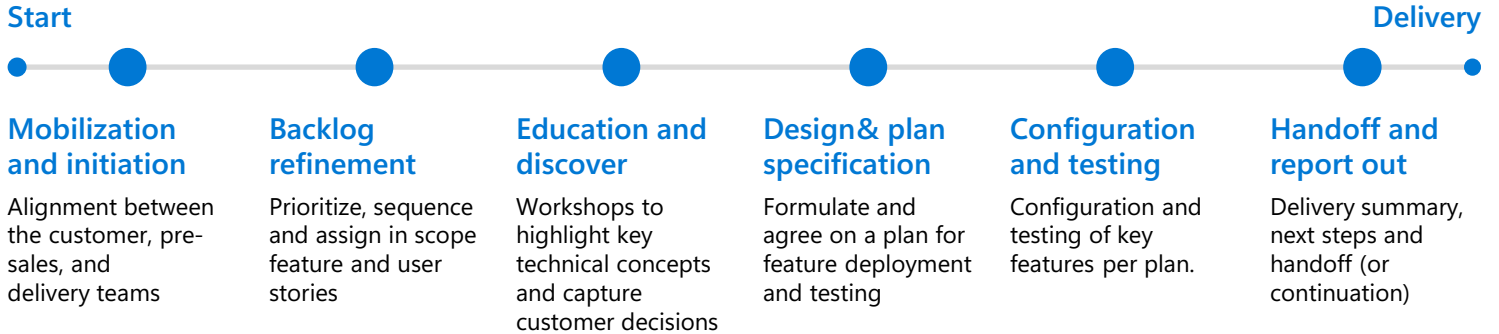

Select your path depending on current state, urgency, and business requirements

Capabilities and Offer Overview

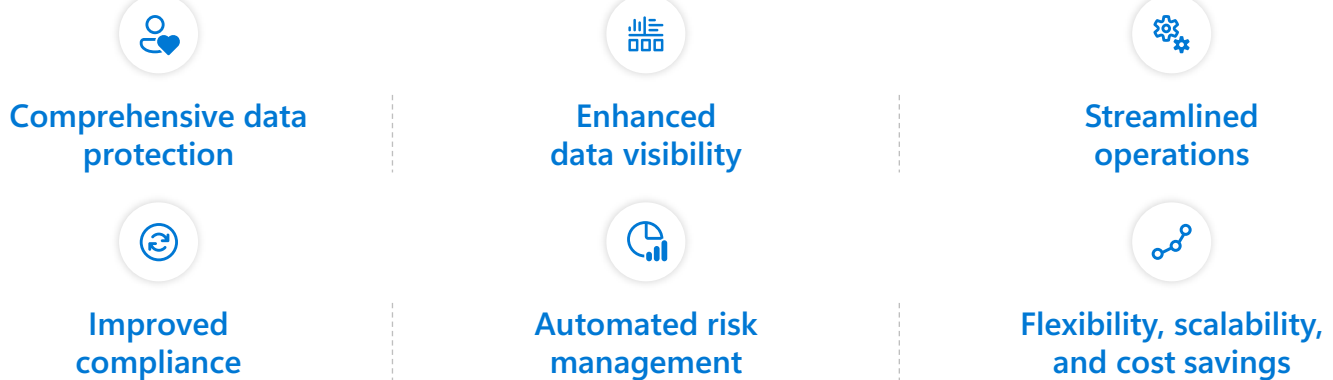

This offer provides multiple options and flexibility for achieving Microsoft 365 and Copilot data security, governance and compliance maturity, starting with advanced Purview planning, preparation for Copilot, and then deep dive implementations of Microsoft Purview solutions in support of in-depth investigation and operations of those capabilities.

Scope

Benefits

Why Microsoft Purview?

Fortify data security with Microsoft Purview

Information Protection

- **Discover, classify, and protect** data at scale, using automation and ML
- Productivity tools with built-in **user-selectable sensitivity labels** for precise controls
- Data is **protected (encrypted) across environments**, throughout its lifecycle

Insider Risk Management

- Leverage **analytics, machine learning, sequencing** to understand user context and intent
- Investigate potential incidents with **curated, high-quality, and enriched** alerts and evidence
- Ensure user privacy while identifying **highest risk users**

Data Loss Prevention

- **Prevent unauthorized use**, like improperly saving, storing or printing sensitive data
- Create, deploy, and manage DLP policies **across all cloud, apps, and devices from a single location**
- Leverage data classification, labeling, and user **insights to finetune and adapt DLP policies**

Adaptive Protection

- Dynamically adjust data security controls based on user risk level
