

DATA PLATFORM INGESTION

[CONTACT US](#)

Scattered data can make it difficult to get the full picture and lead to missed opportunities. Our team will build and deploy a Data Platform centralising your data, allowing for better analysis and more informed decisions.

Improve Business Efficiency

Centralised data management will improve organisation which will lead to increased productivity.

Increased Business Scalability

Establish a secure foundation for your data with a scalable platform that grows alongside your business.

Greater Data Security

Your data platform provides access controls, giving you complete authority over who can access your data.

- **Data Source Workshop:** The Workshop helps you understand the mechanism for moving data from the sources and plan a smooth transition to Google Cloud.
- **Low Level Design Document:** This will include information about the data sources being ingested into the platform, the mechanism for transfer and the specific configuration applied to your environment.
- **Platform Deployment:** Our Engineering team will deploy the core data platform, and expertly stitch together the data sources and platform to ingest your data
- **Data Transformation Planning:** Our team will work with you to discuss the landed raw data in the platform and how to make it usable. We can then present back the best option for building your analysis pipelines.

WHAT YOU GET

Netpremacy will work with you to better understand the needs and requirements of your Data Platform through deployment planning and analysis of data to ensure your Platform will be tailored to your needs and specifications.

WHY NETPREMACY

Netpremacy helps global companies transform and energise their business to gain a competitive edge with Google products. Trusted by trailblazers like Just Eat Takeaway and Morrisons, we're a double award-winning Google Cloud Premier Partner - delivering next-level customer care and true partnerships to add value to our customer's organisations.
