

DATA STRATEGY WORKSHOP

[CONTACT US](#)

The Data Strategy solution aims to help you unlock the power of your data. By delivering a workshop, we can gain a greater understanding of your current data situation and where you hope to be, informing later decisions that will help you achieve your strategic goals.

Alignment With Business Goals

A Data Strategy Workshop ensures your business priorities, working practices and pain-points are all taken into account when proposing a plan of action.

Collaborative Process

Involving people from across the business allows us to gain a more accurate and understanding of data challenges and goals.

Unlocking The Power Of Your Data

Business stakeholders will gain a better understanding of their data, and the potential to improve day to day workflows.

- **Pre-Workshop Survey:** Our team will collect information about your business priorities, current data working practices and existing pain points within your day-to-day workflows.
- **Data Strategy Workshop:** Using the responses collected in the survey our team will guide the discussion to draw out the aims of the data strategy.
- **Post Workshop Analysis and Report:** Our team will create a detailed report based on analysis of the workshop discussion, which will include information about the strategy going forward.

WHAT YOU GET

Our team will bring relevant parties together to discuss your data challenges and strategy in order to propose an appropriate course of action to unlock the power of your data with Google Cloud and achieve your business goals.

WHY NETPREMACY

Netpremacy helps global companies transform and energise their business to gain a competitive edge with Google products. Trusted by trailblazers like Just Eat Takeaway and Morrisons, we're a double award-winning Google Cloud Premier Partner - delivering next-level customer care and true partnerships to add value to our customer's organisations.
