

Google Cloud Marketplace

G-Cloud 15 – Service Definition

Google Cloud Platform offers over 160 popular development stacks, solutions and services optimised to run on GCP in one-click.

Google Cloud offers a robust, enterprise-tailored, and vetted set of business solutions that will help establish you as a development ally. Spend strategically with options that can draw down your GCP committed spend, and enable your developers to procure directly from GCP Marketplace. Lastly, simplify multi-cloud billing with Orbitera Cloud Billing and Cost Management.

Secure

GCP Marketplace offers a breadth of integrated solutions that are vetted by Google against security vulnerabilities to cover your enterprise's IT needs. Scale your procurement process and shift your energy to high-value tasks while getting the right solutions into the right hands when they need it most.

Development

Enable development and facilitate governance, while providing solutions that are vetted by Google against security vulnerabilities. Pick from solution options that can integrate with GCP, on-premises, and even multi-cloud projects with Anthos that help you avoid vendor lock-in.

Billing

Negotiate with partners, take advantage of flexible billing models, and retire GCP committed spend with most transactions through GCP Marketplace. Lastly, get visibility into cloud spend across multiple providers with Orbitera Cloud Billing.

Procure and fast fill

Accelerate the procurement process for you and your teams. You may be able to purchase without the need for an internal vendor review if Google is already one of your preferred partners. Create a scalable and repeatable procurement process with deployments that are integrated with GCP.

Production-ready solutions

Create apps for virtually any use case with solutions provided by commercial partners, open source projects, and Google.

Private Catalogue

Private Catalogue enables control over solution usage and makes internal enterprise solutions easily discoverable.

Anthos applications

Avoid vendor lock-in with Anthos apps that can be deployed anywhere.

Vendor support

Vendor support is included with most commercial solutions.

Private pricing

Get individualised solution pricing quotes with private pricing.

Subscription pricing

Subscription and usage-based billing models fit various business needs.

Single bill

Consolidate billing across cloud providers with Orbitera multi-cloud billing.

Free trials

Match solution expectations with reality with free trials.

Streamlined deals

Remove the need for separate billing agreements since Google is the seller of record for GCP Marketplace products.

GCP integration

Remove deployment headaches with solutions that are tightly integrated with GCP and feature one-click deployments.
