

ZERO TRUST PROGRAMME

From improving policies to implementing user controls, enhance your security posture within your Google Workspace environment with our Zero Trust Programme. This added layer of security will minimise internal security threats, eliminate risks and prevent data breaches.

[BOOK DISCOVERY](#)

Ensure maximum security

Have complete control over your applications and authorisation settings, ensuring they are working at maximum secure levels across the entirety of your business.

Minimise potential risks

Establish additional security measures that underpin the Zero Trust framework, with rules specific to your business allowing different user and device access levels.

Prevent data breaches

Ensure your end-users do not share sensitive data with rules that identify and block confidential information from being shared outside your organisation.

WHAT YOU GET

A complete end-to-end Zero Trust Programme designed to add additional security layers to your Google Cloud environment. The journey to achieve Zero Trust starts by securing your applications with **Base Security Policies**. The next step is establishing a company-defined and controlled application catalogue with **App Access Control**. Then, implementing a core element in **Context-Aware Access** to underpin the entire Zero Trust framework. Finally, you can add preventative measures with **Data Loss Prevention** to protect sensitive data from being shared outside your organisation.

Readiness Evaluation to check your current environment with a report highlighting areas for consideration.

Discovery Workshop to uncover the requirements and discuss technical preparations within the Google Workspace admin console.

Tried & tested project delivery governed by a dedicated Project Manager as part of your team.

Support from Change Managers to inform end users, prepare them for the change, and provide any necessary support.

Smooth Implementation of security features with our specialist technical team.

2-weeks hypercare available for troubleshooting and support following go-live.

WHY NETPREMACY

Netpremacy helps global companies transform and energise their business to gain a competitive edge with Google products. As well as being trusted by trailblazers like Just Eat Takeaway and Morrisons, we're a double award-winning Google Cloud Premier Partner.
