

BigQuery Analysis & Optimisation

[CONTACT US](#)

Unlock the full potential of your BigQuery investment. Stop letting hidden costs and underutilised resources drain your budget. Our experts will partner with your team to pinpoint inefficiencies and optimise your environment, ensuring every pound you spend delivers maximum value!

Reduce Your Cloud Spend

Dramatically reduce your BigQuery spending and accelerate data performance by identifying, refactoring, and optimising inefficient queries.

Eliminate Data Friction

Boost productivity and efficiency across your organisation by analysing your team's unique workflows and removing data-related bottlenecks.

Scale Confidently

Build a future-proof, scalable BigQuery environment that grows with your business, without complexity and overspend.

WHAT YOU GET?

- **Clear Insights:** So we can begin to see potential areas of optimisation, our team will capture your usage data within BigQuery.
- **In-Depth Analysis:** Our team of experts will analyse the data, identifying potential areas for cost and performance optimisation.
- **Engagement With Your Team:** To gain an in-depth understanding of usage and user workflows, our team will work with the relevant teams & individuals.
- **Tailored Optimisations:** This is where we'll begin to refactor identified queries to reduce cost and optimise your BigQuery performance! Once complete, you'll receive documentation summarising the optimisations along with best practices to improve your usage going forward.

WHY NETPREMACY

Netpremacy helps global companies transform and energise their business to gain a competitive edge with Google products. Trusted by trailblazers like OVO Energy, Just Eat Takeaway and Morrisons, we're a double award-winning Google Cloud Premier Partner – delivering next-level customer care and true partnerships to add value to our customer's organisations.
