### Fast Track to Development Efficiency

Running a well evaluated proof of concept allows you see first hand how Code Assist could significantly boost developer productivity within your current established workflow.

### Discover Your AI Advantage

Every development team has unique needs, appointing a pilot group can pinpoint the areas where Gemini Code Assist can have the most significant impact on your team's efficiency and code quality.

### Get Ahead of the Curve

Experiment with Gemini Code Assist in a safe environment. You'll gain valuable insights into how AI can empower your developers, giving you a head start in adopting modern coding practices and staying ahead of the competition.

- **Scoping Survey:** Together we will identify the pain points and needs of your teams, pinpointing where Code Assist can add the most value.
- **Establish a Pilot Group:** Those who would benefit most from Gemini Code Assist will be placed into a pilot group and encouraged to integrate it into their workflows.
- **Change Management Plan:** Throughout your assessment you'll receive clear **communication templates, end-user training, and weekly tips** to ensure a smooth adoption process.
- **Post-POC Survey:** Measure the impact through a survey, determining which groups/teams would benefit most from the tool permanently in their workflows.

## WHAT YOU GET

As a highly knowledgeable team with decades of experience in the Google space we will work with you to understand your strategy and objectives in order to establish a joint business plan and roadmap to work towards.

## WHY NETPREMACY

Netpremacy helps global companies transform and energise their business to gain a competitive edge with Google products. Trusted by trailblazers like Just Eat Takeaway and Morrisons, we're a double award-winning Google Cloud Premier Partner – delivering next-level customer care and true partnerships to add value to our customer's organisations.
