

GOOGLE-TO-GOOGLE MIGRATION

Whether you have acquired a business already using Google Workspace or set up a subsidiary and need to separate your data, a Google-to-Google Migration is essential to ensure your business data is in the right place and accessible to the right people.

[BOOK DISCOVERY](#)

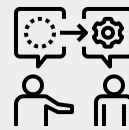

Reduce business impact

Migrate your business data securely and seamlessly whilst minimising business disruption and downtime.

Unify your business units

Bring your teams together and encourage a tighter employee community by having your data all in one place.

Make your business more secure

Improve your security posture and make it easier for your IT admins to manage everything in one environment.

WHAT YOU GET

Deployment Planning Workshop that covers a high-level overview of the work required and business objectives.

Project management to establish a project delivery plan, timeline, and milestones.

The tools needed to migrate your data from the legacy structure into the new Google Workspace environment.

Dedicated consultancy days from SaaS Technical Engineers to complete file migrations.

Support from Change Managers to ensure a smooth migration for your end users.

The key information you need for a successful file migration, with refresher training, if required.

WHY NETPREMACY

Netpremacy helps global companies transform and energise their business to gain a competitive edge with Google products. As well as being trusted by trailblazers like Just Eat Takeaway and Morrisons, we're a double award-winning Google Cloud Premier Partner.
