ASSURE Environment Suite – Land & Property

Service Definition

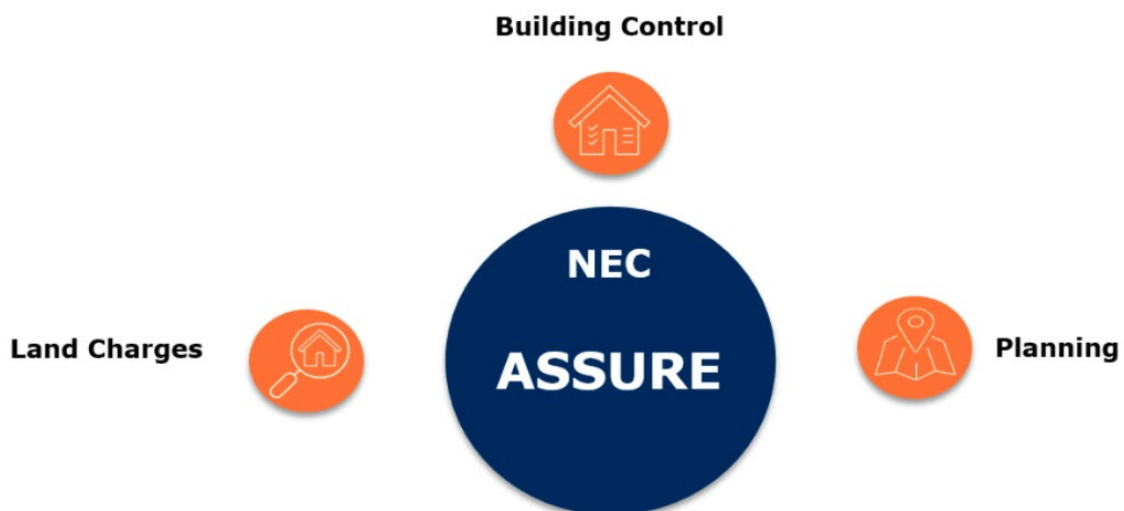

This Service Definition is relevant to local authorities responsible for the provision or management of Land and Property services within the United Kingdom. The service is provided by NEC Software Solutions (NEC).

The ASSURE Environment Suite Standard G-Cloud Service is available as:

1. ASSURE Environment Suite Software as a Service (SaaS).
2. ASSURE Private Cloud (an on-premise, or separately procured, private cloud).

Overview of G-Cloud Service

ASSURE is a comprehensive, configurable software solution that is browser based and device agnostic, focusing on efficiency and automation. It includes both an embedded reporting tool and embedded GIS, as well as case and document management. The software is highly configurable and can accommodate local authorities of all sizes, including those involved in shared services.

Save time, save money, save resource - ASSURE is changing public facing services at the heart of local government to enable you and the citizen to move at the pace of the modern world.

Key Features and Benefits

We've highlighted some of these below:

Features	Benefits
- Built in real-time reporting tool including statutory reports. - Embedded GIS. - Integrated document management. - Online mobile capabilities. - Option for public facing applications and enquiries. - Public facing explorers. - Highly configurable with ability to add bespoke information. - Single Sign On abilities for both officers and citizens.	- Automated processes save officers' valuable time. - Low maintenance, real time mapping direct from Ordnance Survey means minimal manual work required by the local authority. - Browser software enables officers to work anywhere, on any device. - Configurable validation on public applications ensures minimal officer intervention. - Holistic view of data allows for intelligent working.

Core Modules

ASSURE Environment Suite is available as a hosted solution, via our private NEC cloud service (priced separately), or on premise if required. The below modules are available individually or in any combination and can be combined with NEC's Public Protection solution.

Planning / Development Control – The complete planning process from the receipt of an application via manual entry, online submission (optional extra described below) or the national 1APP Planning Portal. The solution provides the complete back-office processing requirement, the ability to generate committee reports and manage the entire consultation process including neighbours and statutory bodies. The application also includes comprehensive modules for the management of Tree Preservations Orders, Listed Buildings and Planning Complaints and Enforcements.

Building Control – Comprehensive management of Building Control applications for the processing of all types of applications.

Local Land Charges – Complete management of the Land Charges process including the LLC1 register and the CON29 supplied with NLIS and HMLR connectors.

Optional Extras

The following options can be added to the standard service described above. They are subject to additional cost.

Online application submission for Building Control - Provides the ability for all types of Building Control applications to be submitted online via citizens / agents including attached drawings / plans and online payment.

Planning Portal Building Control Connector - Provides the ability to automatically retrieve Building Control applications submitted via the Planning Portal including attached drawings / plans.

Online application submission for Planning / Development Control - Provides the ability for all types of Planning / Development Control applications to be submitted online via citizens / agents including attached drawings / plans and online payment.

Explorers - Allows the citizen to review, track and comment on planning applications online including the ability to review supporting documentation. Building control customers can book inspections in addition to viewing application data.

Reporting - Browser based reporting tools embedded within ASSURE to provide quick and easy access to create and run ad hoc reports and queries. This also includes the ability to create dashboards for a holistic view of data and schedule report execution, to save time and effort for the users.

GIS - Browser based GIS solution provides mapping tools with the ability to plot the spatial extent of an application / case, perform spatial queries and return results from both local authority supplied data and open access publish data. Users can manage and share spatial information with interested parties or other GIS systems.

Local Land Charges Service - A unique consultancy service which includes an NEC consultant carrying out all required administration within the Land Charges module for a local authority.

Request a Demonstration

We will be pleased to show you how ASSURE Environment Suite can help improve your processes, free up officer's time and enable citizen self-service. Please email frameworks@necsws.com to request a demonstration.
