

AV Collaboration Devices & Smart Office Technology

Solutions for seamless collaboration, enhanced productivity, and inclusive, sustainable workplaces—wherever your teams are.

Cloud

Tailored Solutions for Smarter Hybrid Workspaces

Whether you need improved hybrid collaboration, optimised meetings spaces, or more engaging workplace experiences, we design, deliver, and support tailored solutions aligned with your goals.

Our end-to-end service starts with understanding your challenges and objectives. We then create a tailored strategy and design, bringing it to life through virtual reality. This allows you to interact with and visualise your design before implementation, minimising risks and accelerating deployment.

Our services:

- › Design Consultation
- › Project Management
- › Procurement
- › Installation and Commissioning
- › Training
- › Ongoing support including VIP

Our Solutions:

- › Microsoft Teams Room (MTR)
- › Hybrid Enablement of Town Halls / Event Spaces
- › BYOD Meeting Rooms
- › Digital Signage
- › Workplace Space Management (Room / Desk Booking, Visitor Check-In, Environment Monitoring)
- › Security

Benefits

Seamless Communication

Collaboration devices like video conferencing systems, interactive whiteboards, and unified communication platforms enable real-time communication and collaboration, reducing delays and improving decision-making.

Hybrid Work Enablement

Collaboration devices support remote and hybrid work models by providing the tools needed for effective virtual collaboration, such as video conferencing and screen sharing.

Global Collaboration

These technologies make it possible for geographically dispersed teams to collaborate as if they were in the same room, breaking down barriers and encouraging diverse perspectives, which can drive innovation.

Automated Tasks

Smart office technologies automate routine tasks such as booking rooms, adjusting environmental controls, and managing workflows, allowing employees to focus on higher-value work.

Optimised Space Utilisation

Technologies like occupancy sensors and room booking systems ensure that office space is used efficiently, reducing wasted resources and helping organisations make the most of their physical environment.

Health and Wellness Monitoring

Smart office technologies can include air quality and noise monitoring solutions that promote a healthy work environment, helping to reduce absenteeism and enhance employee well-being.

Cost Savings and Energy Efficiency

Reduced energy consumption – Smart lighting, HVAC systems, and energy management platforms optimise energy usage by adjusting based on occupancy and environmental conditions, leading to significant cost savings on utilities.

Lower Real Estate Costs

By optimising space utilisation, organisations can reduce the amount of office space needed, potentially lowering real estate costs, and enabling more efficient use of resources.

Deliverables

- › Meeting Room Platforms
- › Collaboration Devices
- › Resource Booking
- › Environment Monitoring
- › Copilot and Meeting Rooms
- › Security
- › Training
- › Adoption and Change Management Programmes

Why Telefónica Tech?

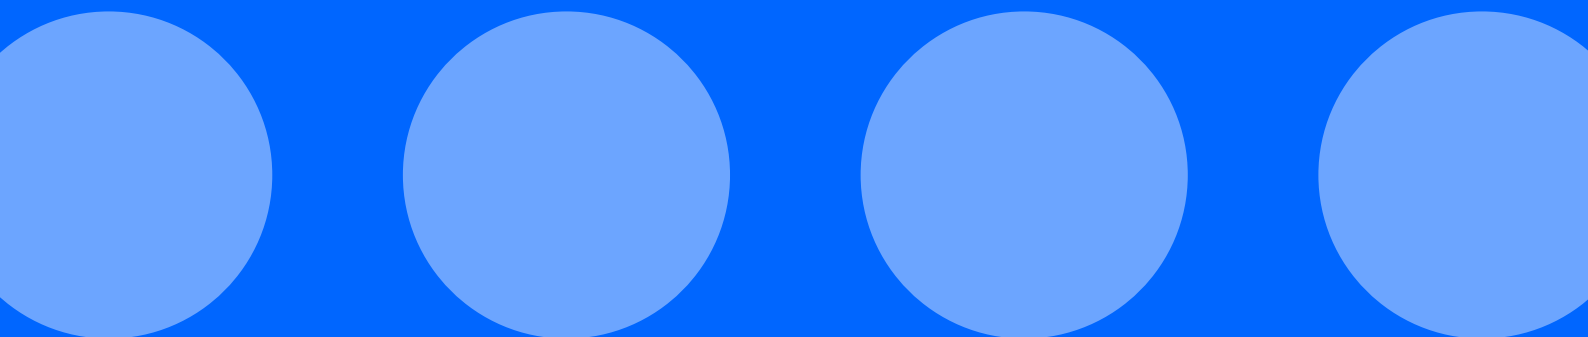

We provide a fully managed, end-to-end service for seamless collaboration solutions and intelligent office spaces. From design consultation and project management to procurement, installation, and ongoing support, we handle every step—freeing up your IT teams, reducing risk and accelerating deployment.

Beyond collaboration and smart office technology, we offer deep expertise across the full digital workplace ecosystem. As a trusted managed services provider, we help you navigate the complexities of productivity, technology adoption, sustainability, and workforce enablement.

Our strategic approach ensures that digital workplace investments deliver measurable impact—enhancing efficiency, security, and employee experience while aligning with business objectives.
