

Copilot for Microsoft 365 Readiness

Transform legacy full-stack applications into
modular, future-proof, cloud-native systems

Service Overview

Microsoft 365 Copilot is a solution that helps users harness the power of AI with the Microsoft 365 apps they are already using.

Microsoft 365 Copilot combines the power of large language models (LLMs) with individual users' data in the Microsoft Graph and Microsoft 365 apps, accessed through natural language, to turn words into the most powerful productivity tools on the planet.

In this series of workshops, Telefónica Tech will introduce Microsoft 365 Copilot, help you understand how it can transform your and your employees' work experience, and identify some of the precautions you should be aware of before using Copilot.

Understand Requirements – Learn about the prerequisites for Copilot for Microsoft 365, including licensing and Operating System version.

Increase Adoption – By assisting with the Adoption Roadmap, we can smooth your journey to realising the potential of the new technology.

Tailored Service – A consultative approach is needed to align the service to meet your requirements AND make the best use of existing investment.

Security and Governance – Copilot can only access the data you can, but are you oversharing sensitive or confidential information? We will help you understand how to protect your data using the standard toolset available in Microsoft 365.

Value – Our consultants will help you make the most of your investment and uncover cost savings and productivity gains that can be realised by introducing Copilot into your organisation.

Benefits:

Understand Requirements

Increase Adoption

Tailored Service

Security and Governance

Value

Our Deliverables:

- Assessment of your current Microsoft 365 environment.
- Art of the Possible workshops to gain valuable insights into your workloads, persona and how Copilot can increase your productivity and creativity.

Why Telefónica Tech?

1. Our Propel method gets you from idea to working solution fast. This lets you unlock value quickly from your modernisation initiatives.
2. We have deep expertise across the full app stack with proven customised solutions that speed your modernisation.
3. We help you adopt change with less risk and disruption, using modular delivery that keeps compliance and quality high.

We focus on high-value apps and features that deliver clear business impact.
