

Project and Programme Management

Service Overview

Cloud can provide significant cost savings, enhance agility, eliminate technology bottlenecks, and enable rapid business innovation. Having worked with a range of public and private sector clients to support the implementation of their Cloud objectives, Telefónica Tech can share its knowledge, expertise, and experience to help realise your Cloud ambitions. Telefónica Tech has been responsible for the successful delivery of numerous cloud-oriented programmes and projects within the public sector. As public sector organisations move towards adopting Cloud computing strategies, it becomes apparent that legacy applications, tools, and processes fundamentally need to be reviewed to ensure the successful implementation of cloud-oriented projects. Telefónica Tech Project and Programme Management services help organisations successfully implement their Cloud strategy on time and on budget. Our Project and Programme Management Services have helped organisations:

- Deploy Cloud-based solutions for their business;
- Migrate existing services, applications and data to Cloud services;
- Integrate existing systems with Cloud services;
- Migrate between Cloud services; and
- Manage the Technology, Data, Application, Service and Business work streams of a cloud-oriented project.

Organisations will need professional and experienced project and programme management services to deliver improved services to their customers. Telefónica Tech uses professionally qualified programme and project managers at the PRINCE2 Practitioner level, who will be deployed to ensure the effective implementation and development of G-Cloud services. This service is ideal if you have a specific Cloud deployment project that involves multiple technologies and vendors. The resource can be utilised as a project, with appropriate consultants assigned to achieve the desired outcome within the time and budget limits agreed with the customer.

The successful delivery of Cloud projects is significantly enhanced by the use of experienced, expert project and programme managers. Project Managers need not only to understand how to drive projects for successful, reliable outcomes in the public sector but also to have a detailed understanding of the issues specific to Cloud delivery and technology. Telefónica Tech Project Managers have this understanding based on successful delivery and a deep understanding of the real-world application of Cloud services. Telefónica Tech has technical project managers who are well-versed in the complexities of delivering cloud and legacy projects successfully.
