

Azure Migration Services

Unlock business agility and innovation with Telefónica Tech's Azure Migration service – smart, secure, strategic, and aligned to Microsoft's best practices.

Cloud

What is our Azure Migration service?

Telefónica Tech's Azure Migration service is designed to facilitate the smooth and secure transfer of organisations' applications, data, and infrastructure to the Microsoft cloud. By following the Microsoft Cloud Adoption Framework (CAF), we ensure alignment with best practices, risk mitigation, and value enhancement. Our comprehensive process includes discovery and assessment, design and planning, build and execution, as well as monitoring and stabilisation. Each stage is meticulously managed by dedicated teams to minimise downtime and ensure a seamless transition.

We deploy scalable teams that utilise established methodologies and an automation-centric approach, incorporating Infrastructure as Code (IaC) and migration tools to optimise efficiency and reduce errors, thereby making the migration process faster and more reliable. Our managed services provide ongoing support to ensure the Azure platform remains up-to-date and aligned with your business goals. By partnering with us and leveraging our expertise and proven methodologies, you can confidently accelerate your cloud journey and drive innovation.

Benefits:

Unlock powerful insights:

Seamlessly integrate advanced AI capabilities – such as ML, cognitive services and data analytics with existing applications to unlock powerful insights for exiting data.

Cost efficiencies: Pay for what you use scalability with consumption models, reducing overall IT costs.

Enhanced security: Assurance of compliant, secure, highly available, and scalable platforms with global reach.

Operational efficiency:

Automation of processes to improve both customer and employee experiences and satisfaction.

Quick to market: Launch new products and features more efficiently utilising API-driven, on-demand technology that operates with enhanced performance, accelerated data access, and superior reliability.

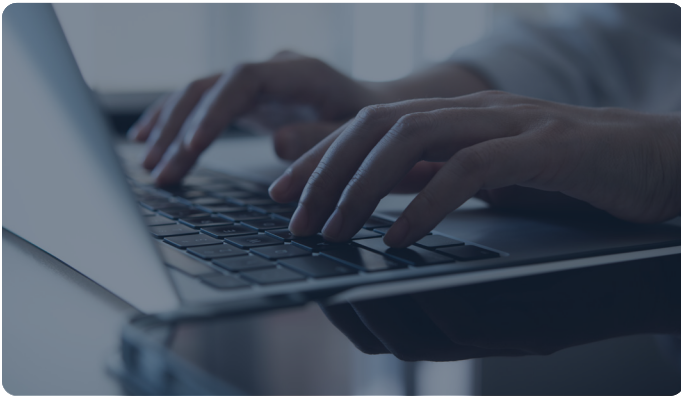

Our Deliverables:

- › **Discovery & Assessment:** Stakeholder workshops and discovery tools are conducted to deliver migration plans, including costs, wave planning, and application migration complexity.
- › **Design & Plan:** Design and migration requirements for each application are captured, including migration tasks, schedules, testing, and low-level design inputs.
- › **Build & Execute:** Migration tooling is deployed, environments are built as code, migration governance is executed, and services are transitioned.
- › **Monitor & Stabilise:** The cloud platform is maintained, secured, and modernised with comprehensive service.
- › **Manage & Optimise:** Managed services are provided to maintain and optimise the Azure platform and supported workloads.

Why Telefónica Tech?

Telefónica Tech is a next-generation solutions provider that integrates the best people, technology, and platforms across Data & AI, Cyber Security, Cloud, and Business Applications. Supported by a dynamic partner ecosystem, Telefónica Tech aims to make a real difference to every business, every day. Our comprehensive cloud expertise ensures end-to-end solutions tailored to your needs, adhering to UK regulations like GDPR and PCI DSS, and leveraging proven partnerships with strategic partners. Our approach focuses on business continuity, security, and compliance. By choosing Telefónica Tech, customers get a smooth migration experience, better performance, and the confidence of working with a trusted partner.

Additional Services to Elevate Your Business

Azure Landing Zone

Telefónica Tech provides a well-architected framework for cloud adoption, ensuring governance, security, and compliance with pre-set policies and access controls.

Application Modernisation

Telefónica Tech offer comprehensive application modernisation services, modernises outdated apps: You take old, slow, or hard-to-maintain applications and rebuild or rework them using modern tools and cloud technologies.

Azure VMware Solution (AVS)

This service provides a robust platform for running VMware workloads natively on Azure, offering scalability, flexibility, and enhanced security.

Azure ARC

Extend Azure management and services to any infrastructure, enabling consistent management and governance across hybrid and multi-cloud environments.

FinOps & GreenOps

Drive cost optimisation and embed savings for sustained cost avoidance and improved IT operations.

Leading the Way in
Digital Transformation
for our Customers

Telefónica Tech unlocks the power of integrated technology, bringing together a unique combination of the best people, with the best tech and the best platforms, supported by a dynamic partner ecosystem to make a real difference to every business, every day.
