

POWER BI SERVICES

G-CLOUD 15

SERVICE OVERVIEW

Telefónica Tech's Power BI services compliment our Data Warehouse build services in allowing organisations to create and publish interactive dashboards and reports as well as assisting with Power BI Governance and Power BI Rollouts. Telefónica Tech work with our clients to identify challenges, needs and reporting KPI's before designing and implementation.

KEY FEATURES

- Business intelligence (BI) and Management Information (MI).
- Share interactive reports published to the web.
- Development of interactive dashboards.
- Data model publication with a data catalog.
- Access on Windows, iOS or Android
- Natural Language exploration.

SERVICE BENEFITS

- Empower users to discovery, analyse and visualise data
- Monitor your important data using a live dashboard.
- Create stunning interactive reports.
- Report on progress against business and customer KPI's
- Analyse data and share insights.
- Visualise reports and dashboards on mobile devices
- Build robust, reusable data models to provide consistency in reporting.
- Import data, reports from Excel, CSV and Power BI Desktop.
