

Microsoft Azure Consultancy Services

Transform legacy full-stack applications into
modular, future-proof, cloud-native systems

Service Overview

Telefónica Tech Azure Consultancy Services provide comprehensive support for organisations at every stage of their cloud journey, whether they are just beginning to explore cloud adoption or looking to optimise an existing Azure environment. Our consultancy offering covers the full lifecycle of cloud transformation, ensuring that customers receive expert guidance tailored to their strategic, technical and operational objectives.

We deliver end-to-end consultancy services encompassing early-stage envisioning workshops, strategic planning and the development of detailed cloud roadmaps. This includes assessing current IT landscapes, identifying opportunities for modernisation and aligning cloud adoption initiatives with wider business goals.

Our consultants work closely with customers to design robust Azure solutions, covering architecture, security, governance and cost management. Once the solution design is agreed, we support the implementation through hands-on delivery, configuration and integration activities. Beyond deployment, we provide ongoing support and continuous enhancement services to ensure that solutions remain effective, secure and aligned with evolving organisational needs.

Our Deliverables:

- Business case and value assessment
- Readiness assessments
- Migration strategies
- Control project costs
- Workload modernisation
- Experience with large and complex Azure solutions
- Mature and proven public-sector experience
- Aligned to organisational challenges/objectives
- OFFICIAL and OFFICIAL-SENSITIVE compliant capabilities
- Reduce risk but increase ROI and TCO using proven methodologies
