

Managed Firewall

Service Overview

Firewalls are a fundamental part of any organisation's protective security strategy. They play a crucial role in protecting your MPLS network and the traffic and data that run across it. However, firewalls are not a trivial technology, so managing and maintaining them requires a high degree of expertise and ongoing effort. If your organisation does not have the skills and resources to manage and maintain your firewalls, Telefónica Tech's Managed Firewall service can add significant value and improve the security of your network

The Telefónica Tech Managed Firewall service provides hosting and MPLS integration, along with the monitoring, management, and maintenance tasks needed to operate your firewalls and protect your networks.

- **24/7 Network Monitoring** – Providing round-the-clock monitoring of your firewall service, ensuring support is always on hand.
- **Improved Configuration** – Our services provide you with effective firewall configuration, tailored for your business needs.
- **Access to Specialised Talent** – Our support teams are deeply experienced across all major firewall vendors, providing you the expertise you need.

Additional Services

Telefónica Tech provides secure digital enablement to organisations through our portfolio of managed and professional services spanning Hybrid & Public Cloud, Cyber Security, Modern Workplace, Networking & Connectivity, and Applications, Data & AI. For example:

- Network and Cloud Assessment Services
- SDWAN
- Cloud and Security Services
- Cyber Security Maturity Assessment
- DDoS Mitigation
- DRaaS
- Infrastructure as a Service
- Hybrid Cloud Management

Benefits:

Monitor traffic bandwidth.

24/7 alerting for availability.

Apply bandwidth profiles to manage bandwidth within contractual limits.

Assigned Public IP range per customer.

Simple NAT configuration.

Firewall policy creation and updates.

UTM AV and IPS setup.

SSL VPN setup

IPsec VPN setup

Update the firmware twice a year – if a major CVE emerges, an emergency firmware update can be performed.

Our Deliverables:

- 24/7 Network Monitoring
- Improved Configuration
- Access to Specialised Talent

Why Telefónica Tech?

1. Our Propel method gets you from idea to working solution fast. This lets you unlock value quickly from your modernisation initiatives.
2. We have deep expertise across the full app stack with proven customised solutions that speed your modernisation.
3. We help you adopt change with less risk and disruption, using modular delivery that keeps compliance and quality high.

We focus on high-value apps and features that deliver clear business impact.
