Protection against sophisticated threats – You get the most sophisticated protections available for targeted threats, malicious URLs, attachments, impersonation and spam emails.

Artificial Intelligence – Artificial Intelligence limits an attacker's information gathering capabilities, detects highly targeted email threats and empowers users.

Web Security – Mimecast web security service protects against malicious and business-inappropriate web activity, and provides visibility and control over employee cloud application use.

Cyber Resilience – A solution that keeps employees connected during an email outage, protection against malicious web activity, encryption & data loss prevention, and archiving.

Our Deliverables:

- Anti-Virus
- Anti Spam
- URL Protection
- Attachment Protection
- Impersonation Protection
- Internal Email Protect
- Stationary – Branding, Signatures and Disclaimers
- Data Leak Prevention
- Comprehensive awareness training with integrated phishing simulation and custom content
- Cloud-based web protection at the DNS level
