

ENTERPRISE RESOURCE PLANNING (ERP) G-CLOUD 15

SERVICE OVERVIEW

Telefónica Tech provides an Enterprise Resource Planning (ERP) service based on Microsoft Dynamics 365 Finance and Supply Chain Management to support organisations in managing core business operations through a single, integrated platform.

Microsoft Dynamics 365 ERP provides a comprehensive suite of applications covering finance, procurement, supply chain, manufacturing, retail and human resources. Hosted on Microsoft Azure, the service enables organisations to modernise legacy systems, improve operational control and gain real-time insight across business functions.

The ERP service integrates seamlessly with other Microsoft technologies, enabling organisations to streamline processes, improve reporting and support informed decision-making through a secure, scalable cloud-based platform.
