

Hybrid Cloud Management

Transform legacy full-stack applications into modular, future-proof, cloud-native systems

Service Overview

Managing hybrid cloud environments can present significant challenges, as governance, management and monitoring tooling, security, and visibility can vary depending across on-premises, data centre hosting, and public cloud platforms.

Telefónica Tech's Hybrid Cloud Management offering bridges these gaps and provides a unified management and security experience across a range of on-premises and hosted, private, and public cloud platforms with cost, security, workload placement, orchestration, and optimisation controls, as well as user self-service capabilities as part of a solution that helps you to make informed decisions and maintain control over IT assets across various technologies.

Enhanced Visibility & Control – Gain a clear view of your organisation's infrastructure estate across multiple platforms from a single, unified user interface, with simplified, streamlined dashboard and reporting capabilities that address capacity, performance, utilisation, and security.

Improved Performance, Tighter Cost Controls – Identify workloads that require optimisation or right-sizing, and ensure they run on the most performant, cost-effective platform by consolidating infrastructure, tooling, and licenses for similar services.

Agility & Efficiency – Automate common, scheduled tasks to reduce the workload on your IT team and empower them to focus on innovation or the delivery of more impactful work and projects. Leveraging the scalability of public cloud resources when needed enables your organisation to adapt to changing demands.

Increased Security – Apply security and access controls as well as organisational or regulatory compliance policies consistently across multiple platforms and audit their effectiveness to improve your security posture and reduce the potential for vulnerabilities.

Benefits:

A flexible, easy-to-deploy, and easy-to-operate management interface.

Wide-ranging support for workloads hosted across different platforms and technologies.

Process automation and a consistent, cloud-like management experience.

Regular workload optimisation assessment and efficient rightsizing with appropriate placement recommendations across platforms, with migration tooling to support moves.

Our Deliverables:

- Enhanced Visibility & Control
- Improved Performance, Tighter Cost Controls
- Agility & Efficiency
- Increased Security

Why Telefónica Tech?

1. Our Propel method gets you from idea to working solution fast. This lets you unlock value quickly from your modernisation initiatives.
2. We have deep expertise across the full app stack with proven customised solutions that speed your modernisation.
3. We help you adopt change with less risk and disruption, using modular delivery that keeps compliance and quality high.

We focus on high-value apps and features that deliver clear business impact.

Additional Services to Elevate Your Business

Cloud Strategy

Scale cloud adoption for maximum business impact.

GreenOps

Measure and optimise your cloud carbon footprint, making your cloud operational sustainable.

FinOps

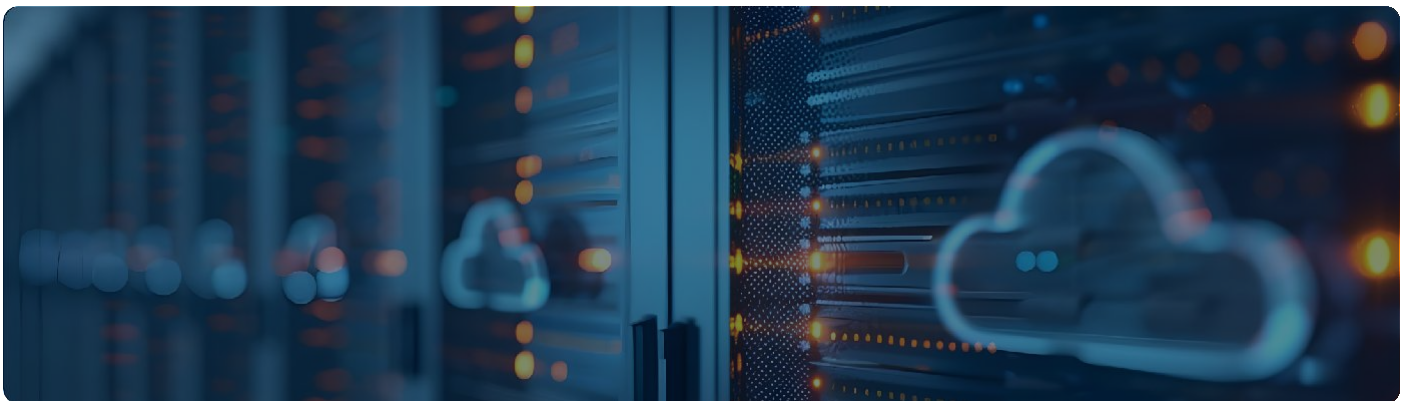

Optimise your cloud spending and boost financial accountability.

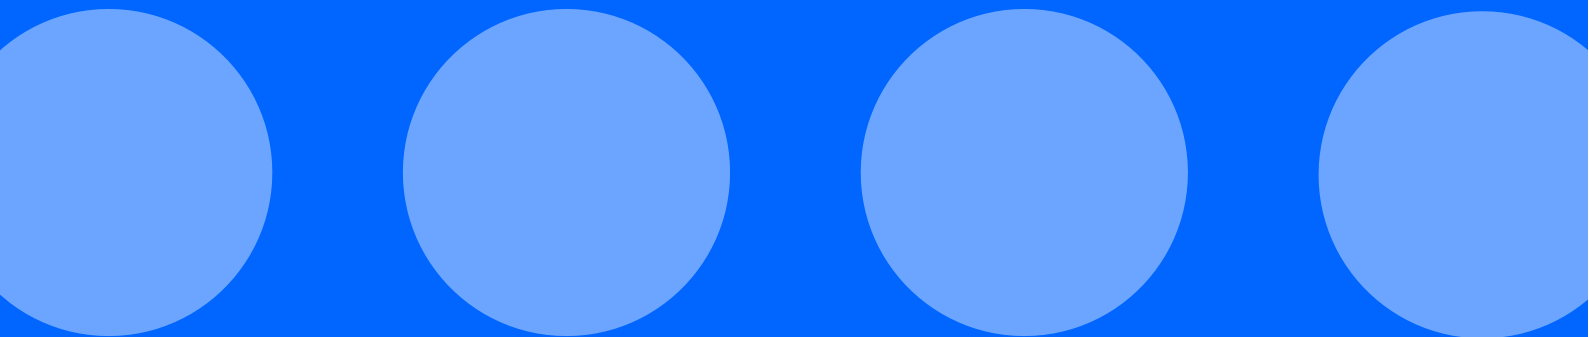

Multi-Cloud

Deliver workload freedom by deploying your workloads across multiple cloud providers seamlessly.

Cloud Managed Services

Expert management and support for your cloud environment.

Leading the Way in *Digital Transformation* for our Customers

Telefónica Tech unlocks the power of integrated technology, bringing together a unique combination of the best people, with the best tech and the best platforms, supported by a dynamic partner ecosystem to make a real difference to every business, every day.
