

Cloud Deployment Services

Transform legacy full-stack applications into modular, future-proof, cloud-native systems

Service Overview

Cloud computing can provide significant cost savings, enhance agility, eliminate technology bottlenecks, and enable rapid business innovation. Having worked with a range of public and private sector clients to support the implementation of their Cloud objectives, Telefónica Tech can share its knowledge, expertise, and experience to help realise your Cloud ambitions.

Telefónica Tech has been responsible for the successful delivery of numerous cloud-oriented programmes and projects within the public sector. As public sector organisations adopt cloud computing strategies, it becomes apparent that a key success indicator for the project will be the smooth, timely deployment of new cloud technologies to users across the organisation.

Telefónica Tech Deployment services help organisations successfully deploy their Cloud strategy on time and on budget while ensuring that the integrity of the live environment is protected and the correct components are released into production.

Our Deployment services have helped organisations:

- Follow ITIL-based Change, Release and Configuration processes.
- Package multiple changes into a release to reduce the frequency of releases and, hence, the impact on the live environment.
- Develop version control; and
- Assess the technical and non-technical impacts of any deployment.

To deliver improved services to their users, organisations will need professional, experienced Deployment services to maintain a consistent data and application stack. Telefónica Tech uses professionally qualified and experienced Architects, Developers, Consultants, and Project Managers to ensure the effective integration and deployment of G-Cloud services.

This service is ideal if you have a specific Cloud deployment project that involves multiple technologies and vendors. The resource can be utilised as a project, with appropriate consultants assigned to achieve the desired outcome within the time and budget limits agreed with the customer.

Successful delivery of Cloud projects is significantly enhanced by using experienced and expert

Benefits:

Define – analyse, and capture business requirements

Shape – high-level solution development with a business perspective

Design – low-level solution development with a functional perspective

Deliver – managing the transition from implementation to steady-state service.

Deployment Services. Telefónica Tech provides Deployment Services when implementing new solutions for customers and when customers require existing systems to be updated with new versions in a controlled manner. Telefónica Tech's Deployment expertise has enabled our clients to achieve:

- Higher success rates in deploying hardware and software, which in turn improves the quality of service and reputation delivered to the business.
- Consistency in the Deployment processes for hardware and software products makes the process repeatable and scalable.
- Improved expectation setting within the organisation by publishing a Deployment schedule in advance and
- Error reduction through the controlled hardware and software deployment to the live environment.

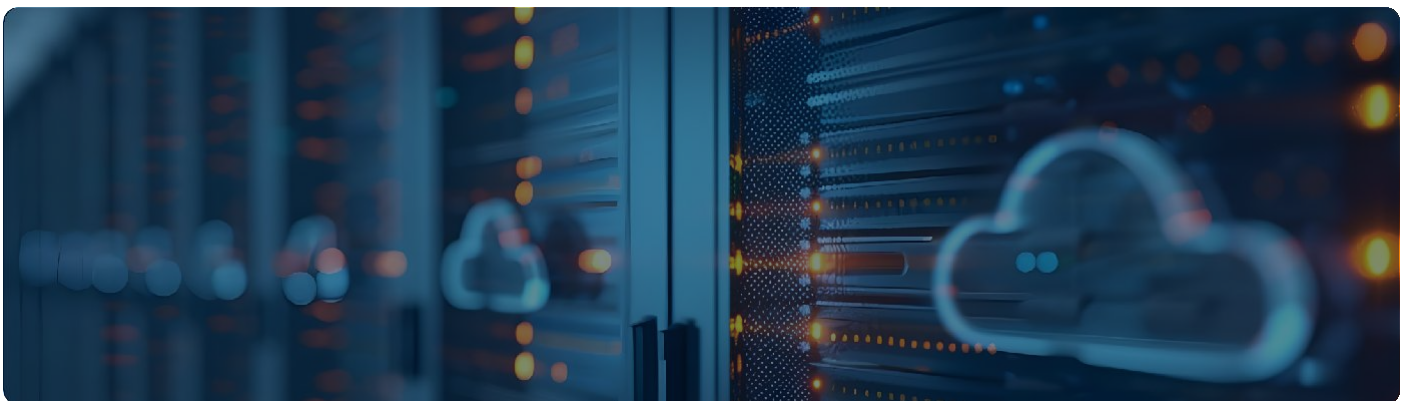

Our Deliverables:

- Business Process Modelling
- Business Case Development
- Requirements Gathering
- Data Modelling
- Non-Functional Design
- Functional Design
- Interface Analysis
- Strategy Development
- Data-Driven Decisions

Why Telefónica Tech?

1. Our Propel method gets you from idea to working solution fast. This lets you unlock value quickly from your modernisation initiatives.
2. We have deep expertise across the full app stack with proven customised solutions that speed your modernisation.
3. We help you adopt change with less risk and disruption, using modular delivery that keeps compliance and quality high.

We focus on high-value apps and features that deliver clear business impact.

Leading the Way in *Digital Transformation* for our Customers

Telefónica Tech unlocks the power of integrated technology, bringing together a unique combination of the best people, with the best tech and the best platforms, supported by a dynamic partner ecosystem to make a real difference to every business, every day.
