

MICROSOFT DYNAMICS 365 FINANCE & PROCUREMENT PLATFORM

G-CLOUD 15

SERVICE OVERVIEW

Telefónica Tech provides a Microsoft Dynamics 365 Finance and Procurement service to support medium to large organisations in managing their financial operations, procurement processes and supply chain activities through a single, integrated ERP platform.

Microsoft Dynamics 365 Finance and Supply Chain Management is Microsoft's flagship enterprise resource planning solution, providing robust financial management, procurement, supply chain and operational capabilities. The service supports organisations to modernise legacy ERP environments, improve financial control and reporting, and streamline end-to-end processes while aligning to governance, security and compliance requirements.

The service can be delivered as a new implementation, an upgrade from legacy systems, or as an extension to existing Dynamics 365 capabilities, providing a scalable platform that supports long-term operational needs.

KEY FEATURES

- Design, development and deployment of Dynamics 365 Finance and Procurement
- Configuration using standard capabilities and low-code approaches
- Upgrade and migration from legacy finance and procurement systems
- Integration with other Microsoft Dynamics 365 and Power Platform solutions
- Financial management, budgeting and reporting capabilities
- Procurement and supplier management processes
- Supply chain and operational process support
- Workforce and time management capabilities
- Secure, role-based access and governance controls
- Scalable cloud-based ERP platform

KEY BENEFITS

- **Improved Financial Control**
Provides greater visibility and control over financial operations and expenditure.
- **Streamlined Procurement Processes**
Supports more efficient sourcing, purchasing and supplier management.
- **Modernised ERP Platform**
Replaces legacy systems with a secure, cloud-based Microsoft solution.
- **Improved Reporting and Insight**
Enables timely, accurate reporting to support financial and operational decision-making.
- **Operational Efficiency**
Reduces manual effort and improves consistency across finance and procurement processes.
- **Flexible Delivery Approach**
Can be implemented incrementally to reduce risk and disruption.

- **Scalable Platform**

Supports organisational growth and changing operational requirements.

- **Experienced Delivery Team**

Delivered by specialists with experience implementing enterprise ERP solutions.
