

Power BI Training

Transform legacy full-stack applications into modular, future-proof, cloud-native systems

Service Overview

Telefónica Tech offer multiple structured training modules designed to provide comprehensive, in-depth learning across all the areas required to ensure your organisation can adopt and use Power BI with confidence and success. Each module has been meticulously planned and developed by our certified Power BI specialists, who draw on extensive real-world experience in data modelling, visual design, governance, and analytics best practice. The curriculum has been purposefully shaped around the four key Power BI personas to ensure that every participant receives content that is relevant, practical, and directly applicable to their role.

Our programme goes beyond standard feature walkthroughs by embedding hands-on exercises, real case studies, and scenario-based learning that reflect the complexities of modern business data environments. Whether participants are focused on administration, dataset design, report creation, or data consumption, each module ensures they gain the skills needed to work effectively within the Power BI ecosystem. This includes understanding how to manage and monitor workspaces, apply Microsoft-recommended best practices, design performant data models, write optimised DAX, and build interactive, insightful reports that support confident data-driven decision-making.

Training can also be fully customised to your organisation's data landscape, governance standards, and strategic objectives, ensuring maximum relevance and impact. By upskilling your workforce across all four personas, Telefónica Tech empower teams to build scalable, high-quality analytics solutions and increase overall adoption of Power BI across the business.

Our Deliverables:

- Training is aligned to four key Power BI personas
- Includes administrator modules for managing and monitoring
- Includes dataset designer modules for developing data model & DAX
- Includes report author modules for designing interactive, insightful reports
- Includes report consumer modules for understanding how to analyse reports
- Training can be customised to clients requirements and data
- Training is interactive, with real case studies.
- Trainer/Facilitators are up to-date with all new Fabric features.
- All content used is aligned to the latest MS recommendations.
- The Power BI ecosystem is supported and used by a trained workforce
- Empowers users with the knowledge to master Power BI
- Offers knowledge in data modelling & writing DAX
- Offers knowledge in creating reports that are interactive & insightful
- Offers knowledge in aligning with Microsoft best practices
- Offers knowledge in ensuring solutions built are performant & scalable
- Offers knowledge in managing and monitoring Power BI artefacts
- The training delivered is both interactive and hands-on
- Offers knowledge on all new Fabric features.
- Drives up adoption by upskilling the workforce

Why Telefónica Tech?

1. Our Propel method gets you from idea to working solution fast. This lets you unlock value quickly from your modernisation initiatives.
2. We have deep expertise across the full app stack with proven customised solutions that speed your modernisation.
3. We help you adopt change with less risk and disruption, using modular delivery that keeps compliance and quality high.

We focus on high-value apps and features that deliver clear business impact.

Additional Services to Elevate Your Business

Cloud Strategy

Scale cloud adoption for maximum business impact.

GreenOps

Measure and optimise your cloud carbon footprint, making your cloud operational sustainable.

FinOps

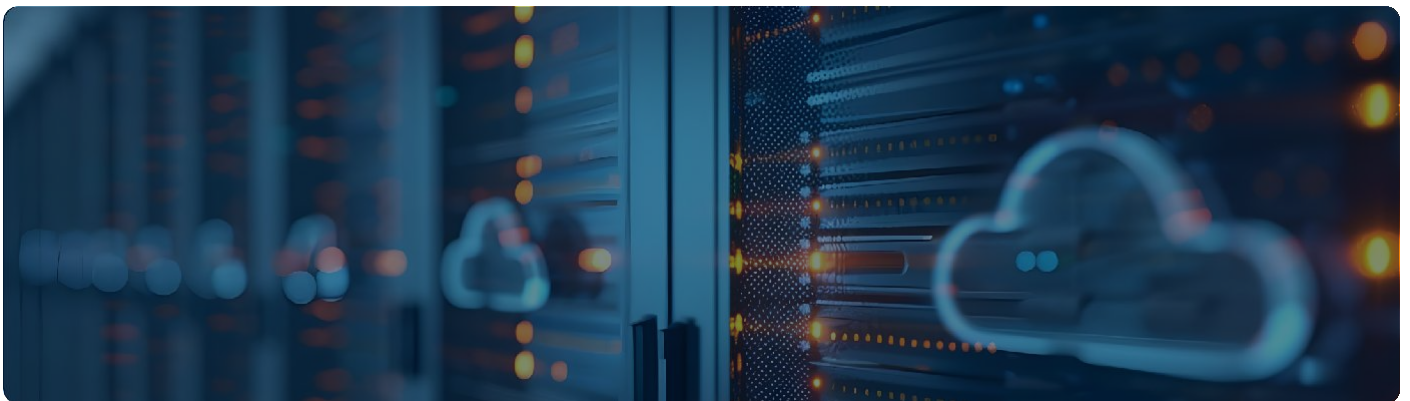

Optimise your cloud spending and boost financial accountability.

Multi-Cloud

Deliver workload freedom by deploying your workloads across multiple cloud providers seamlessly.

Cloud Managed Services

Expert management and support for your cloud environment.

Leading the Way in *Digital Transformation* for our Customers

Telefónica Tech unlocks the power of integrated technology, bringing together a unique combination of the best people, with the best tech and the best platforms, supported by a dynamic partner ecosystem to make a real difference to every business, every day.
