

Cloud Security

Transform legacy full stack applications into modular, future-proof, cloud-native systems

Service Overview

Our goal is to help your teams regain control of their security in the cloud by smoothly incorporating it into all design and operational processes, creating a secure fabric throughout.

Our Cloud Security solution is designed to identify, assess, and manage the challenges and threats of the cloud, thanks to a set of capabilities that support your business and help you maximise cloud adoption confidently.

Telefónica Tech's Cloud MSS service focuses on comprehensive public and private cloud security, covering governance and protection throughout the lifecycle of cloud infrastructure and applications.

Automated vulnerability scanning. An independent and objective assessment of infrastructure, software and employee security clearly highlights the security risk to corporate and customer data from external and internal vulnerabilities.

Red Team Assessment. Our Red Team service is designed to test and continuously improve the effectiveness, detection, and response capability of companies' information security defences by simulating attack scenarios using the Techniques, Tactics, and Procedures (TTPs) of real adversaries.

Benefits:

Having visibility and governance of the assets deployed in the cloud independently of the CSP (Cloud Solution Provider).

Continuous assessment and compliance of the cloud infrastructure according to different regulatory frameworks and best practices.

Protection of workloads throughout their lifecycle and threat detection. Identity management in the cloud. Implementation of security policies customised to the customer's environment.

Service delivery based on dashboards and KPIs that allow the customer to gain visibility into security and monitor it for continuous improvement.

Our Deliverables:

- Regulatory Compliance
- Fortifying
- Expertise
- Protection and Detection
- CI/CD Pipeline Integration

Why Telefónica Tech?

1. Our Propel method gets you from idea to working solution fast. This lets you unlock value quickly from your modernisation initiatives.
2. We have deep expertise across the full app stack with proven customised solutions that speed your modernisation.
3. We help you adopt change with less risk and disruption, using modular delivery that keeps compliance and quality high.

We focus on high-value apps and features that deliver clear business impact.

Additional Services to Elevate Your Business

Cloud Strategy

Scale cloud adoption for maximum business impact.

GreenOps

Measure and optimise your cloud carbon footprint, making your cloud operational sustainable.

FinOps

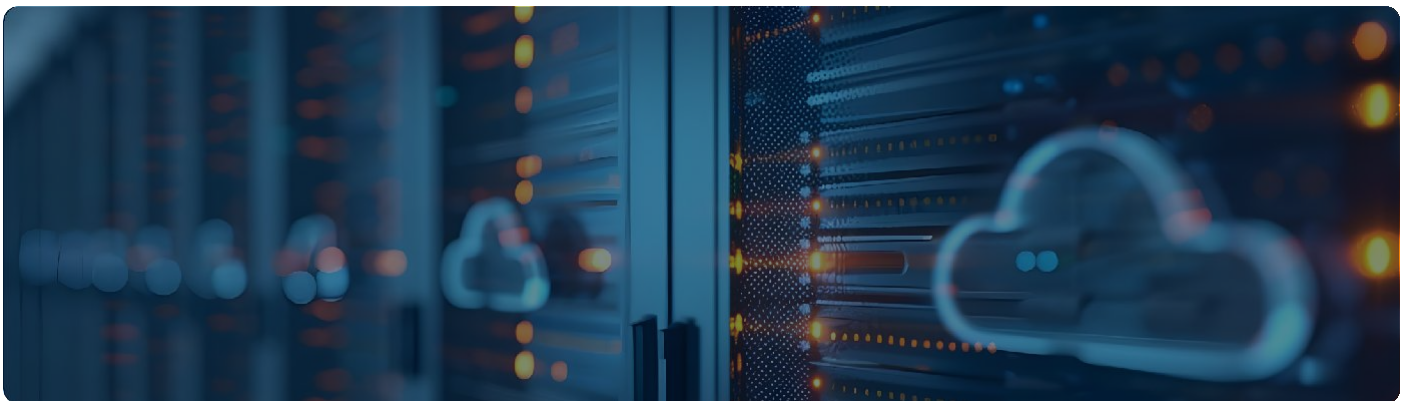

Optimise your cloud spending and boost financial accountability.

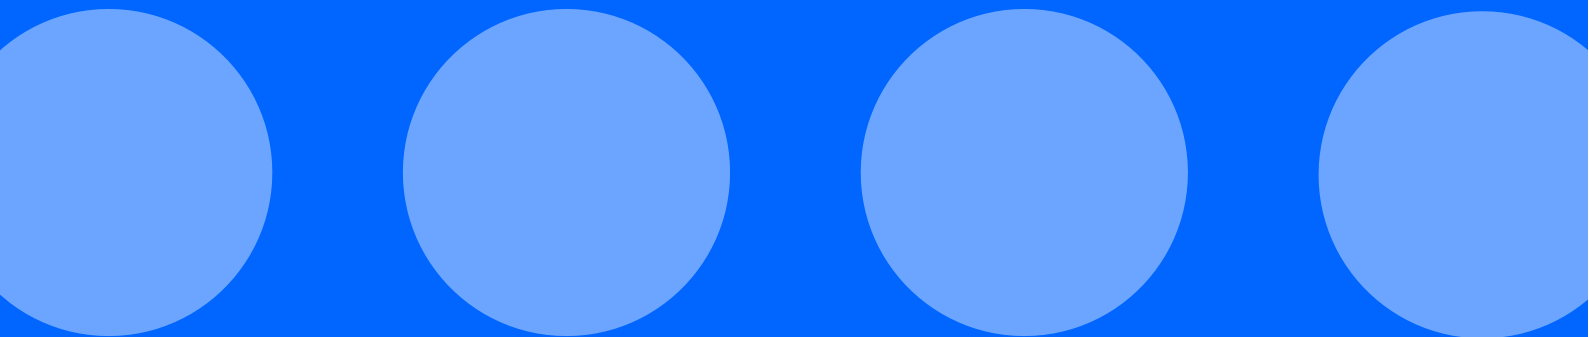

Multi-Cloud

Deliver workload freedom by deploying your workloads across multiple cloud providers seamlessly.

Cloud Managed Services

Expert management and support for your cloud environment.

Leading the Way in *Digital Transformation* for our Customers

Telefónica Tech unlocks the power of integrated technology, bringing together a unique combination of the best people, with the best tech and the best platforms, supported by a dynamic partner ecosystem to make a real difference to every business, every day.
