

Casedoc Court & Justice Case Management

PRICING DOCUMENT

Version: 3.0
Date: 30/01/2026

Pricing Summary

The Court & Justice Management Solution is provided on the following standard terms:

- The Casedoc solution is offered through several monthly based pricing plans presented in the table below.
- The price is based on monthly subscription but billed annually and in advance.
- Pricing assumes a minimum number of users per the table, hosting within the Azure commercial Cloud, 50 gigabytes of storage, standard backup and availability, and standard support hours. Please contact us for other options and storage increments.
- The Customer can always upgrade to a higher pricing plan or add new product or service components to the solution with respective payment recalculations (see the PDMS rate card for details of costs).
- Services can be provided based on an hourly rate or fixed price for the project, and some form of requirements gathering, or requirements verification needs to be to provide services pricing.
- A setup fee may apply.
- Professional services will be provided at rate card rates (please see included Rate Card).
- All pricing is subject to VAT.

AI agents interact with our systems as authenticated users. Depending on the type of agent, they count as 2 or more users from a licensing perspective.

Agent Users	
AGENT TYPE	RATIO AGENT TO USER LICENSE
Assist (suggests clarifications, drafts text, no authoritative writes)	1:2
Operator (can execute writes/workflow transitions but with approval gates)	1:5
Autonomous agent (can register, schedule, create/update records with only end stage approvals)	1:8

The following conditions apply to the license:

- Minimum SaaS License purchase is 10 named users
- Minimum Service Subscription period is 3 months
- Service Subscription Termination period is 3 months
- AI services that use Azure AI Service will be invoiced based on the actual spend. This approach is taken for AI services as are developing and improving rapidly and new commercial models are arising and new open-source models being announced. Further this supports use of buyer's own AI services.
