

Amazon Detective pricing

Pricing overview

Amazon Detective is priced based on the volume of data ingested from AWS CloudTrail logs, Amazon Virtual Private Cloud (Amazon VPC) Flow Logs, Amazon Elastic Kubernetes Service (Amazon EKS) audit logs, findings sent from integrated AWS services to AWS Security Hub, and Amazon GuardDuty findings. You are charged per gigabyte (GB) ingested per account/Region/month. There is no additional charge to enable these log sources for analysis or for data stored in Amazon Detective. Amazon Detective maintains up to a year of aggregated data for its analysis. Amazon Detective is available globally. For a complete list of Regions where Amazon Detective is offered, see the [AWS Region](#) table.
