SOLUTION BRIEF

IRONSCALES™ Complete Protect™

Cloud Messaging Security with Advanced Threat Protection and Security Awareness Training

Get continuous protection against phishing and account takeover attacks that breach your security and reach your inbox.

Phishing is a human + machine created problem that is best solved with a human + machine solution. Complete Protect™ from IRONSCALES combines automated anti-phishing technologies with Phishing Simulation Testing (PST), and Security Awareness Training into a seamless and tightly integrated APIbased solution.

Complete Protect™ delivers a powerfully simple integrated cloud messaging security solution (ICMS) that works within Microsoft 365 and Google Workspace. It's fast to deploy, easy to use, and protects your employees against today's most evasive phishing threats and M365 account takeover attacks. We deliver active email security in the mailbox using anomaly detection; this is the most effective way to stop advanced phishing threats like Business Email Compromise (BEC), Ransomware, and more.

> With IRONSCALES doubling down on their AI plus human insights (HI) approach to protecting organizations like mine from phishing threats, we're seeing an increase in awareness from our employees, a decrease in the number of threats we need to respond to, and confidence across the board that we're being proactive in protecting our assets.

Unleash the Power of AI and Human Insights in IRONSCALES™ Complete Protect™

Artificial Intelligence

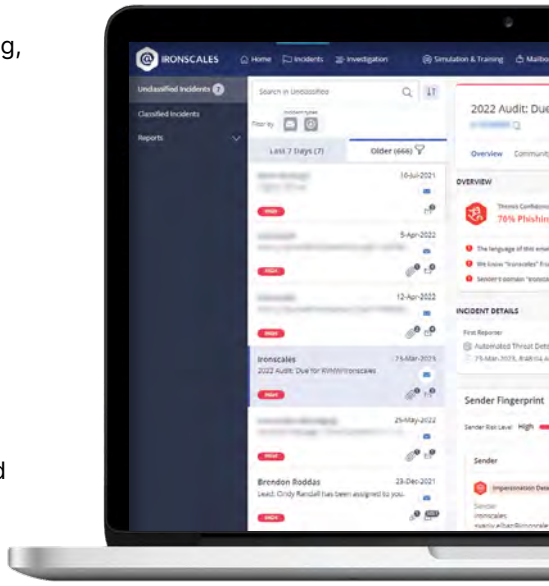
- Advanced Threat Protection
- Continuous Behavior Analysis
- Automated Inbound Email Scanning
- Automated Incident Response
- Fake Login Page Protection
- Account Takeover Protection
- Microsoft® Teams Security

Human Insights

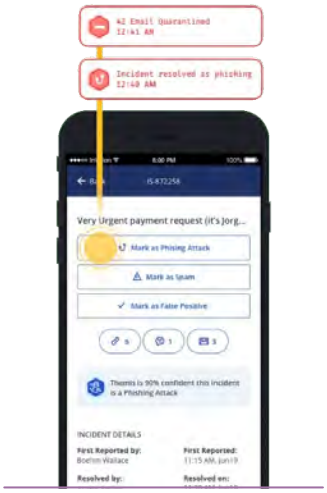
- Report Phishing Buttons
- Crowdsourced Threat Intel
- Inline Email Alert Banners
- Phishing Simulation Testing
- Security Awareness Training (SAT)
- Reporting Console
- GPT-Powered Spear Phishing
- Autonomous Campaigns
- Themis CoPilot

Powerful Protection

Leverage a powerful combination of AI/ML, natural language processing, visual scanning, human intelligence, and community insights to automatically discover, alert, and remediate advanced phishing threats like malware, business email compromise (BEC), ransomware, and credential theft, that get past other security layers.



- **Gain vital AI-generated insights** on sender anomalies and risk factors for advanced phishing threats.
- **Protect against time-detonated attacks** with continuous scanning of malicious links and attachments using hundreds of industry-leading URL and attachment scanners.
- **Defend against advance phishing attacks** like Business Email Compromise and Account Takeover that utilize social engineering techniques by leveraging the IRONSCALE virtual SOC analyst, Themis, to build social graphs of your employees and their communication habits.



Enterprise Efficiency

Reduce the effort to detect and remediate phishing threats using AIpowered phishing protection that automatically detects and quarantines polymorphic threats.

- **Automatically group and remove** multiple malicious emails in all your inboxes based on similar characteristics with one-click remediation.
- **Resolve incidents on the go** using the IRONSCALES mobile app.
- **Make quick, informed decisions** by viewing how over 20,000 of your peers classify a suspicious email as phishing, safe, or spam.

Adaptive Awareness

Effortlessly incorporate phishing simulation testing, dynamic email banners, and further reduce risks and increase your employee's grasp of the phishing threats that they are vulnerable to by

- **Alerting employees of potential threats** with dynamic, straightforward email banners.
- **Empowering your users to quickly report** suspicious messages with a click of a button.
- **Quickly simulating real-world phishing threats** with Recommended Campaigns based on seasonal events, trends, and more, or turn an actual phishing email into a simulation template in a few clicks.
- **Creating personalized spear phishing simulations** with GPT-Powered phishing simulation testing
- **Ensuring all employees get automatically tested** with autonomous campaigns-just click the months you want us to send tests and we do all the work
- **Empower employees with Themis CoPilot** so they can interact with our AI about the risk of a particular email, how they should respond, or even craft a reply when deemed safe

Account Takeover (ATO) Protection

Exclusive to Complete Protect™

Protect your employees' user credentials, financial information, sensitive data, and more. Account takeover fraud occurs when an attacker steals a user's login information to access sensitive data or financial information. This is often done through phishing attacks that exploit trust, such as fake login pages for email accounts.

- **Enhanced ATO leverages Microsoft 365 graph API** for real-time monitoring and analysis of accounts for anomalous activity.
- **Offers 1-click remediation** from your computer or mobile device so you can address phishing threats quickly.
- **Goes beyond Active Directory events** by incorporating email account-level data and individual user behavior data for detection.

With IRONSCALES ATO protection, even the most sophisticated account takeover (ATO) attempts are stopped—in minutes, not hours or days.

Microsoft Teams® Security

Exclusive to Complete Protect™

Add a robust layer of security for Microsoft Teams® to help keep organizations safe. Employees commonly let their guards down when using collaboration and messaging platforms, thinking they are safe because they are "internal-only," but this is not always true. Malicious links and attachments are still a threat, especially when external parties are allowed connect to these platforms, increasing the risk of phishing, theft, and impersonation.

- **Automatically scans** malicious or suspicious links and attachments shared in Microsoft Teams®
- **Comprehensive incident management and reporting** via IRONSCALES dashboard, mobile app, and email
- **Built for use with Microsoft 365** for seamless integration and configuration in just two clicks

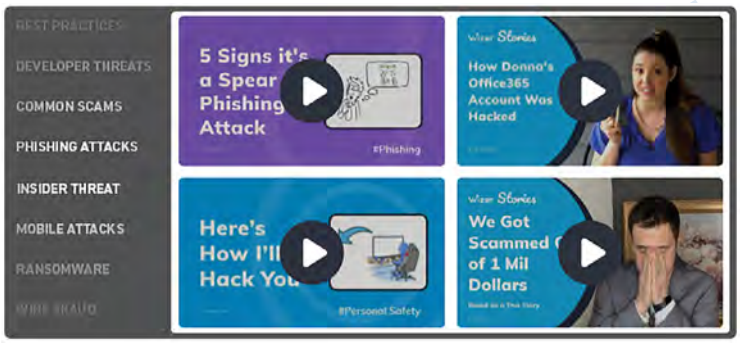
Get proper Microsoft Teams security with integrated cloud messaging security (ICMS) from IRONSCALES™.

Security Awareness Training (SAT)

Ensure your Employees are a Strong Line of Defense Against Phishing. Easily send and track training videos on a wide range of security-related topics to the people who need them most. Combining this exclusive training content and the new SAT options enables you to:

- **Provide your users with engaging bitesized videos** based on real-world threats with over 100 videos to choose from in up to nine languages
- **Launch targeted training campaigns** in a few clicks, to everyone, or just specific people, or smart groups
- **Address multiple industry compliance training requirements**
- **Track measurable outcomes** with detailed engagement reporting

With IRONSCALES, you get the Right Training for the Right People, at the Right Time.



Discover Your Vulnerabilities with Our Free 90-Day Scan

Quickly identify hidden threats in your Microsoft Office 365 environment with our free 90-day scan. This service reviews your email environment to detect advanced phishing, BEC, VIP impersonations, and other threats that your existing solutions may have missed.
