

AWS Service Catalog - IT service catalog

Create, share, organize, and govern your curated IaC templates

Benefits

Fast deployment

Quickly find and deploy approved, self-service cloud resources.

Stay agile

Stay agile while improving governance over resources across multiple accounts.

Streamline workflows

Streamline workflows by connecting to ServiceNow and Jira Service Management.

Stay up to date

Get up-to-date, accurate application definitions and metadata with AWS Service Catalog AppRegistry.

Why Service Catalog?

Create, organize, and govern a curated catalog of AWS resources that can be shared at the permissions level so you can quickly provision approved cloud resources without needing direct access to the underlying AWS services.

Use cases

Automate access to ML notebooks

Speed up innovation by providing end users with safe, automated access to SageMaker machine learning (ML) notebooks.

[Learn more about self-service provisioning](#)

Apply access controls

Scale and control permissions so you can manage resource access in multi-account AWS environments.

[Learn more about access controls](#)

Provision resources for AWS accounts

Deploy baseline networking resources and security tools for new AWS accounts so you can govern consistently.
