Overview

OmniSSA Access and Hub Services deliver multifactor authentication (MFA), conditional access and single sign-on (SSO) for applications delivered by OmniSSA Workspace ONE. By acting as a broker to other identity stores and providers, OmniSSA Access enables organizations to quickly and more securely implement application and device strategies that deliver consistent, enterprise-wide access to applications and data from any device in any location.

OmniSSA Access provides;

- Consumer-like User Experience for Enterprise Apps - Unified user experience across different device types and operating systems simplifies the user experience leading to improved productivity and satisfaction.
- Zero Trust Access - Continual verification of device status and step-up authentication enables compliance with Zero Trust or BeyondCorp security initiatives.
- Fast Onboarding of New Applications - By acting as a broker to different identity stores and providers including AD, ADFS, AAD, Okta, and Ping, OmniSSA Access can quickly deliver apps from on-premises and multi-cloud infrastructures.
- A Smarter Digital Workspace - Be ready for the newest Workspace ONE benefits on day one such as Hub Services and OmniSSA Intelligence.

Pricing Options

Prices listed are monthly based on 12 months prepaid with Production-level support. Additional term lengths and billing options are also available.

When licensing OmniSSA Access in a device-license model, the SSO and Access Control technology is restricted to work only on licensed devices and from managed applications. Organizations looking to enable or allow access to enterprise applications from any web browser, must license Workspace ONE in a per-user license model.
