

Resiliency Built for the Modern Workplace

Unified data protection across your entire technology stack—from multi-cloud to SaaS applications. We make recovery a given so you can stay focused on business.

Complete Protection — Across Clouds and SaaS Applications

As organizations adopt new technology, their risk of cybercrime multiplies. With 40% of data breaches occurring in multi-cloud environments, data requires consistent coverage to prevent irreversible loss and maintain business continuity. The AvePoint Confidence Platform's best-in-class data protection expands to more SaaS applications — ensuring coverage, continuity, and confidence wherever work happens.

One Platform. All Your Data. Fully Protected.

Widespread Backup and Recovery

Seamlessly protect your entire technology stack

- Standardize protection for worry-free auditing and compliance
- Granular recovery options minimize disruption

Scalable Multi-Cloud Framework

Manage protection in a single pane of glass

- Monitor backup jobs and perform restoration for every source in one portal
- Unified risk visibility to prevent data loss

A Platform You Can Trust

Reliable protection with vendor neutrality

- Zero-trust, agentless backup architecture
- Immutable, air-gapped backups

Instead of having to log into multiple portals to check the status of the backups or perform restores, we now have a **one-stop location**. I spend about 10 minutes a day to check both platforms, compared to one hour to 1.5 hours before, freeing me up for more important responsibilities.”

- Andrew Ritschel | Senior Systems Administrator | Centerline Communications
