

Enabling you to deploy and
consume your business critical
applications at SECRET

User Problem Statements

Access and consume business-critical applications and services in an assured IT environment to maintain data integrity and compliance.

Poor user experience and impact on productivity when needing to consume services from multiple networks, platforms and hosted services.

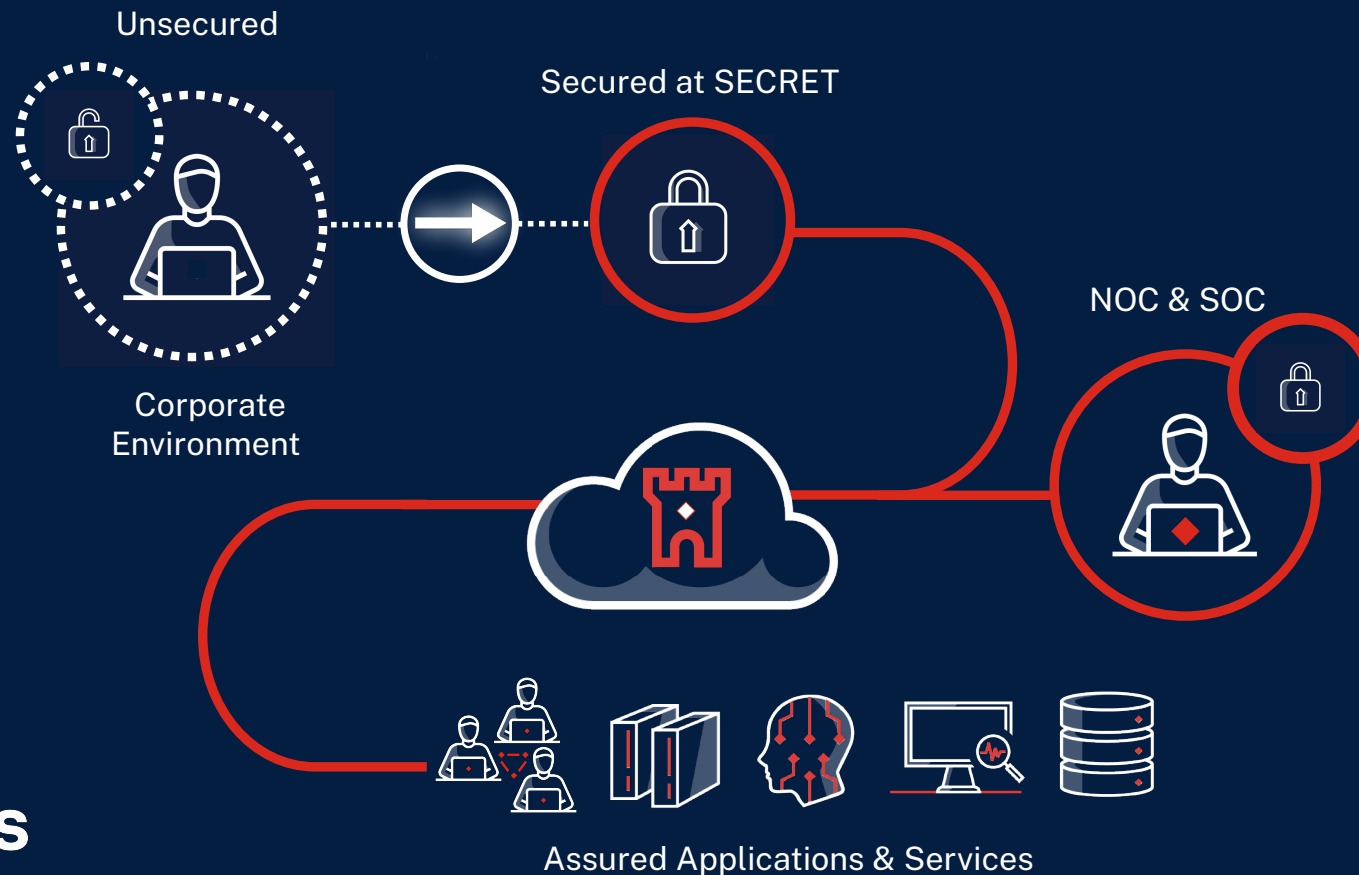

Lack of transparency and tracking of deployed services with service provider, including tracking costs and incurring hidden fees.

Not able to scale up or down easily, or rapidly deploy additional workloads, or virtual machines and applications in an assured secure workspace.

Barriers of entry selling products and services to UK Government and Defence. Including a longer time to market for redesign of corporate systems and adhering to security demands and compliance.

Inability to self-manage or adopt a collaborative and flexible approach / service model that works for my business needs with rigid managed service providers.

Safeguard your Business-Critical Applications and Secrets

Fortress is the leading UK Sovereign, next-generation, defence-grade digital environment at SECRET. Designed to enable organisations to deliver complex programmes and maintain the highest levels of compliance and assurance to protect your secrets and intellectual property.

Offering SaaS and AI capability options with a self-service portal and the ability to onboard, develop, manage and consume your own business-critical applications and services - all in a unified, assured environment.

Secure-by-design, enabling you to deploy and manage virtual infrastructure at pace. Fortress also removes barriers to entry for suppliers selling into UK Government. Businesses can accelerate time to market, avoid expensive redesigns and meet compliance demands without compromising agility.

Fortress is the UK Sovereign digital foundation that empowers you to thrive in the high-assurance Defence market - combining uncompromising security with the agility, transparency and user experience needed to deliver success.
