

**Does your current
communications solution meet
the availability, resilience and
readiness needs for a no-fail
operation?**

Sentry, an extremely high readiness C2
information system designed to operate
when communications are mission-critical
and resilience is essential for success.

Military support to UK resilience and security operations requires information capabilities that are dynamic, secure and available when the mission dictates. Solutions must be easy to use, resilient and able to operate in uncertain and volatile environments yet deliver guaranteed results in support of the mission.

The need to maintain Command and Control during all phases of an operation is essential for enhanced decision-making and situational awareness.

The ability to establish communications should not be limited by the availability of critical national infrastructure that much of today's information services rely upon.

The risks the UK faces are volatile, varied and interconnected. It is essential that, in a time of crisis, information services are available and resilient, enabling staff and decision-makers to focus on the operation with the knowledge that the network, cyber security, infrastructure and equipment is fully managed.

1. Extremely High Readiness

- <15 minutes notice to effect.
- UK Sovereign capability
- SECRET voice and data services.
- No specialist skills required to deploy.

2. Fully Managed Service

- 24x7 Support.
- Security Operations Centre Monitoring.
- Deployable support engineers.
- Secure by Design Assured by the MOD.

3. Resilient Solutions

- Mobile and fixed operation.
- Resilient bearers of opportunity.
- Network geographic diversity.
- MOD enterprise connected.

A Dynamic Solution

Sentry is a rapidly deployable C2 information system delivered as-a-service in support of operational use-cases within the MOD, government, and national security sectors where secure mobility, resilience and ease of deployment are vital.

With security and simplicity at its core, Sentry has been designed to be deployed and operated by generalist users, with setup achieved in under 15 minutes. Prolinx provide a complete service-managed capability with industry-leading guaranteed levels of availability, 24x7x365.

Acknowledging that operational scenarios can be difficult to forecast, Sentry can dynamically use multiple bearers of opportunity to enable connectivity in the most challenging of environments. With multiple system variants, command and control is supported at all phases of an operation, including whilst users are in transit.

Benefits of Sentry

- Prolinx's fully managed service provides all equipment items delivered as-a-service, negating the cost of technical debt and obsolescence.
- A dedicated tenant on Prolinx's Tier 2 secure hosting environment with enhanced security features, and the flexibility to on-board 3rd party applications.
- Unified Communications including messaging, voice and video.
- SPOC service desk providing 24x7 service operations aligned to ITIL4.
- A dedicated Service Delivery Manager to assist customers during delivery, onboarding and through-life support.
- Connectivity and interoperability with MODNet services at SECRET, including MS SharePoint, MS Office and email.
- Geographically resilient architectural design: secondary data centre; fallback enterprise encryption; multiple network bearers.
- Fully provisioned cyber security functions, including SOC, remote patching, updates, and NCSC CAPS approved encryption.
- Confidence that Sentry is compliant with UK Government and MOD security policies and standards, including alignment with NCSC architectural patterns, NIST principles and MOD DEFSTANs.
- 4 system variants that meet a range of operational requirements and use-cases, including Secure Classified Areas and users in transit (secure mobility).
- Dedicated Sentry SharePoint and MS Office suite for your organisation.
- Multiple end user devices – tablet, laptop, desktop, thin/zero client, providing maximum flexibility for dynamic operational scenarios.

User Benefits

Extremely high readiness deployments

A proven capability in-service today

No specialist SQEP required

Sbd Assured

Quick and simple to set-up

Fully managed service

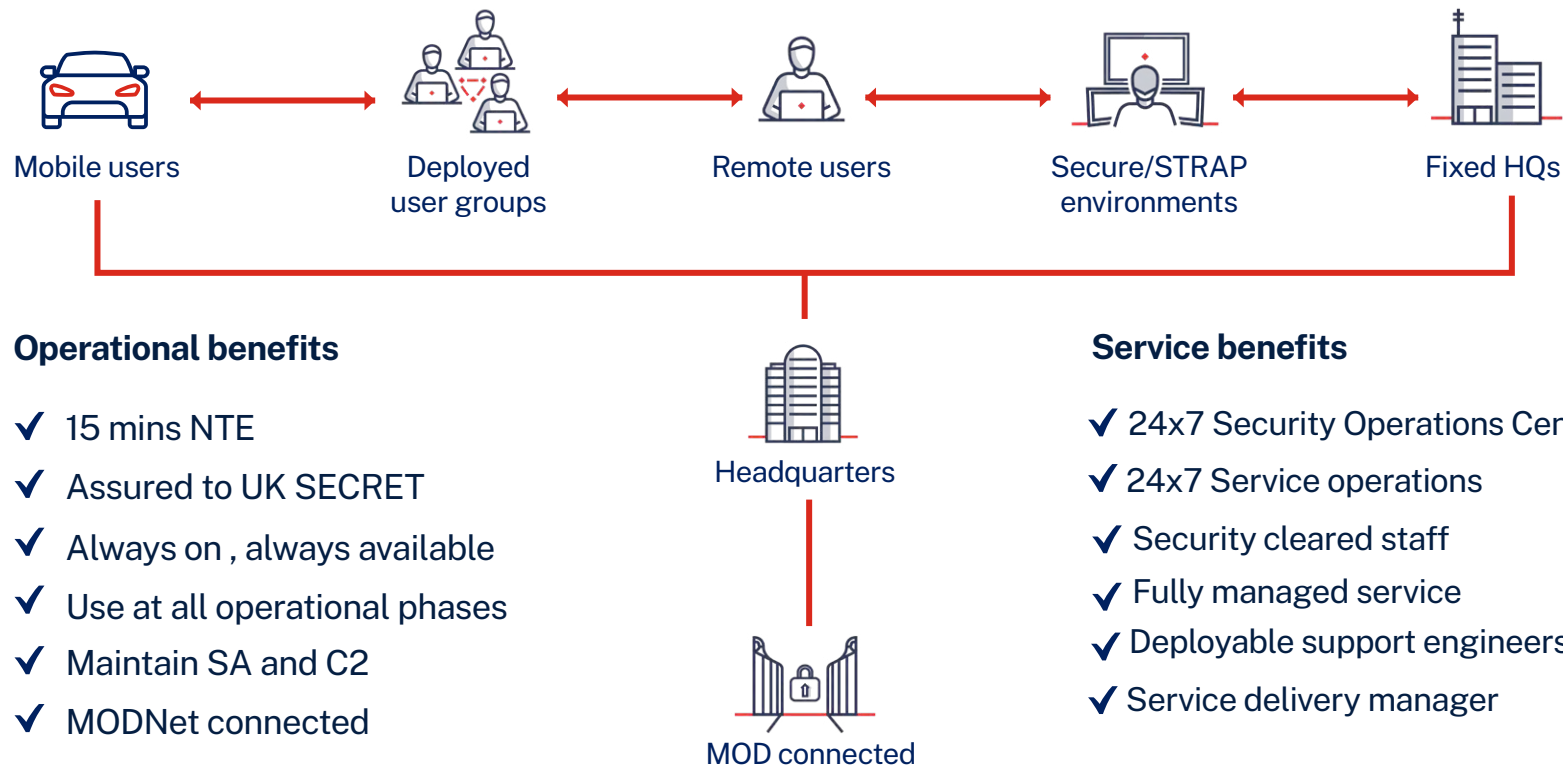

MOD connected

Enhanced collaboration

NATIONAL INSTITUTE OF
STANDARDS AND TECHNOLOGY
U.S. DEPARTMENT OF COMMERCE

National Cyber
Security Centre
a part of GCHQ

27 Years of experience.

Over two decades of experience delivering secure cloud solutions.

100% UK Sovereign.

British-owned SME with assured UK Sovereign data centres delivered by a highly-skilled, security cleared workforce.

24/7 Support

Continuous support for our Sentry services.

Prolinx are industry leading experts at delivering innovative cloud solutions to Defence, National Security sectors and their partners where seamless connectivity and collaboration is the key to enabling secure data driven success.

Our digital solutions protect your data in our trusted hosting environments while supporting your mission and operational objectives by providing assured, secure, UK sovereign cloud to your organisation and partners.

We have a fully security cleared staff and offer engineering excellence delivered by our skilled and empowered workforce in transparent partnership with our clients.

Prolinx already supports MOD, industry partners and their supply chains by securely protecting their data achieving information advantage in mission critical projects.
