

Deploy and consume
business-critical services in a
UK Sovereign secure enclave.

User Problem Statements

Access and consume business-critical applications and services in an assured and compliant IT environment to maintain security, data integrity and compliance.

Challenges with migrating and hosting applications in an assured and compliant IaaS / PaaS cloud, especially when processing OFFICIAL-SENSITIVE data.

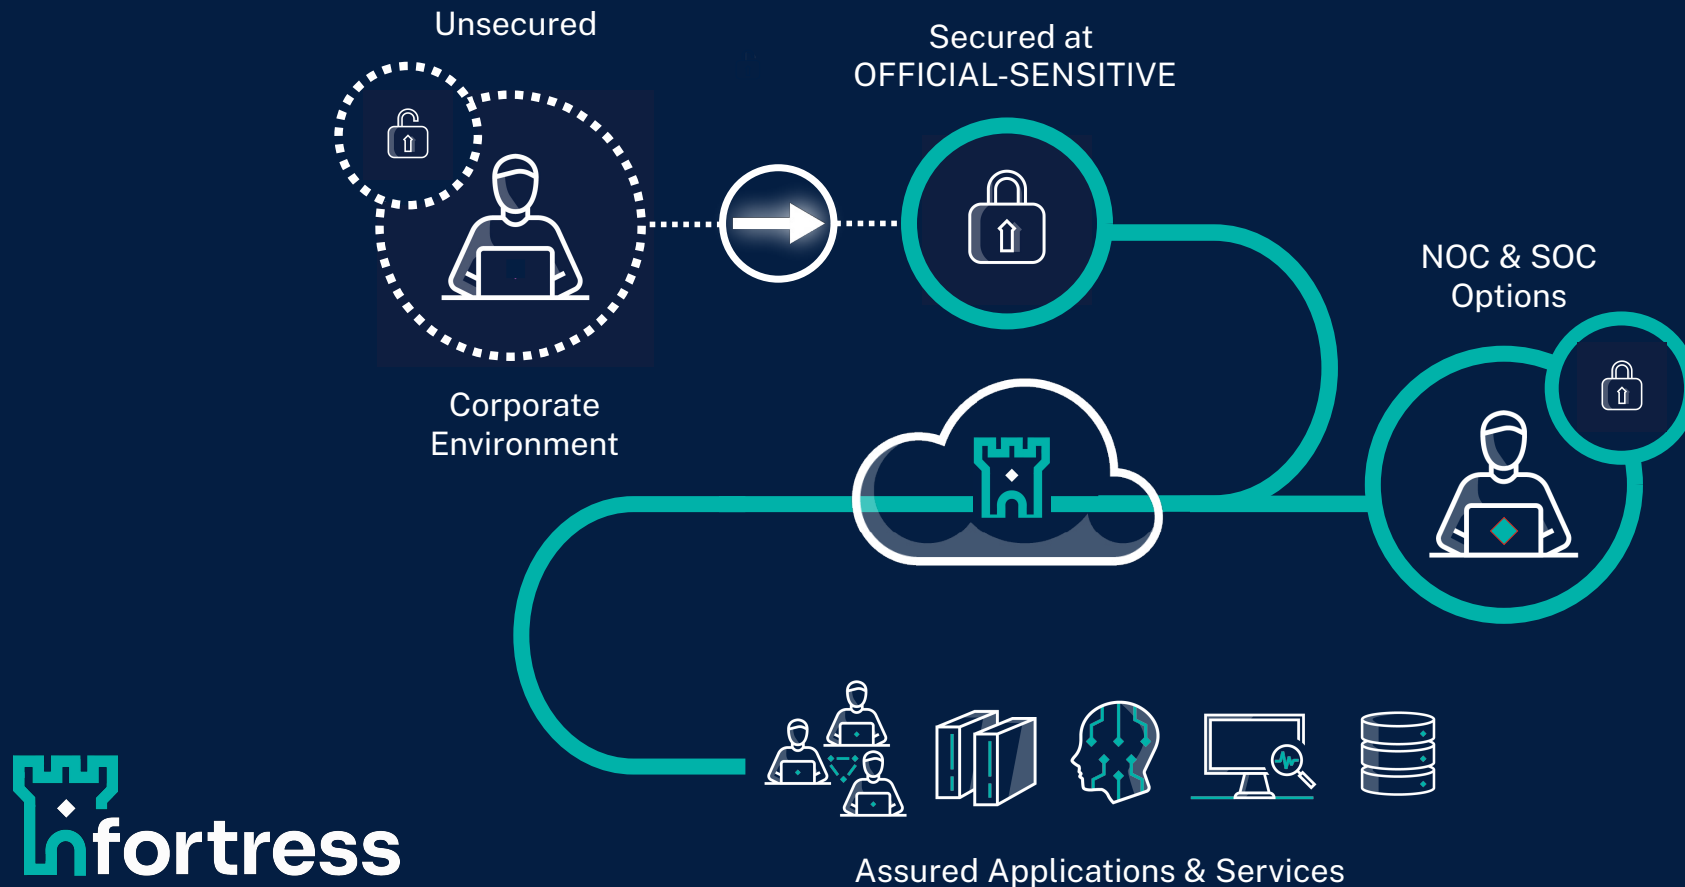

Lack of transparency and tracking of deployed services with service provider, including tracking costs and often incurring hidden fees.

Not able to scale up or down easily, or rapidly deploy additional workloads, or virtual machines and applications in an assured and fully-managed secure workspace.

Barriers of entry for selling of products and services into UK Government and Defence, including a longer time to market due to redesign of corporate systems to adhere to security demands and compliance.

Inability to self-manage or adopt a collaborative and flexible approach / service model that works for my business needs with rigid managed service providers.

Safeguard your Business-Critical Workloads and Applications

Fortress Secure is the leading UK Sovereign, next-generation, defence-grade digital environment at OFFICIAL-SENSITIVE. Designed to enable organisations to deliver complex programmes and maintain the highest levels of compliance and assurance to protect your sensitive data and intellectual property.

Offering application migration and hosting, as well as a growing catalogue of SaaS and AI capabilities-you can onboard, develop, manage and consume your own business-critical applications and services-all in a unified, truly UK Sovereign environment.

Secure and Sovereign-by-design, enabling you to deploy and manage virtual infrastructure at pace. Fortress also enables suppliers selling services and software into UK Government. You can accelerate time to market, avoid expensive redesigns and meet compliance demands without compromising your agility.

Fortress is the UK Sovereign digital foundation that empowers you to thrive in the high-assurance Defence market-combining uncompromising security with the agility, transparency and user experience needed to deliver success.
