Cyber Security Health Check

SA Group's Cyber Security Health Check is a critical starting point to ensure you understand your organisation's cyber posture. The check will identify your weakest security areas and recommend appropriate measures to mitigate your risks. A Cyber Health Check is essential to establish a solid foundation on which to build your security infrastructure as part of a Cloud migration or expansion project.

Our consultants have the experience your business needs to enact the end-to-end cloud journey. We will ensure integration with existing systems and processes as well as making the necessary recommendations to enable future growth. Benefits include:

- | | |
|---|---|
| 1. Secure infrastructure to comply with regulatory initiatives and compliance standards | 3. Provision of detailed Action Plan to close any identified gaps |
| 2. Identification of gaps within critical risk areas | 4. Risks effectively mitigated in line with your organisational objectives |
| | 5. Better understanding of your security areas and their overall Cyber security |

Our list of services:

- | | |
|--|---------------------------------------|
| 1. Cloud Cyber Security Scope and Strategy | 6. Incident Response |
| 2. Data Protection and Privacy | 7. Malware Protection |
| 3. SOC/CSOC Optimisation Review | 8. Network Segmentation and Firewalls |
| 4. Secure Software Development Review | 9. Access Control and Authentication |
| 5. Configuration Standards and Secure Settings | 10. Information Security Policies |

Compliance services

From a regulatory perspective, a Cyber Risk Assessment will also help you manage and adhere to what can be an extensive list of internal and external compliance requirements, providing value and assurance to your key stakeholders.

Compliance standards adhered to include:

- | | |
|---------------|------------------|
| • 27K | • FFIEC |
| • CIS | • NIST CSF |
| • GDPR Sec | • ISO22301 |
| • Event Cyber | • Maritime Cyber |

Our security services

SA Group's specialist cyber team can be brought in at any stage of the project to advise and assure on:

- Security strategy
- Security risk management
- Security design
- Security architecture
- Cyber security consultancy
- Security testing
- Security incident management
- Security audit services

A fully managed, independent service

It is important to continually monitor and review the risk environment to ensure that any changes within your organisation that may evolve into risks are detected. The processes that are put in place need to be managed and evaluated on a regular basis to maintain compliance and ensure that your risk mitigation programme supports your Cyber Strategy and decision making.

About SA Group

SA Group is a Cyber Security, P3M and Technical consultancy working in critical Public Sector and Commercial markets. We specialise in helping customers scope and deliver against challenges within increasingly complex digital environments.

We provide professional consulting services to help solve critical challenges and navigate through complex change. Many of these tasks are highly technical, and we specialise in providing the expertise required on a flexible basis.

Our success is driven by the reputation of our people, a collegiate and agile approach to the requirements, and our determination to deliver value to our clients. Working collaboratively with customers, we use innovative digital technology, taking advantage of current and emerging trends, cyber security, and the design, implementation, and support of critical IT and communications infrastructure.
