Supply Chain Cyber Security Assessment

Our cyber security assessment service mitigates risks associated with using third party services and suppliers who process your data, and your clients'. Our service helps you implement NCSC, ISO, ISF, and NIST standards throughout your supply chain.

Our consultants have the experience your business needs to enact the end-to-end cloud journey. We will ensure integration with existing systems and processes as well as making the necessary recommendations to enable future growth. Benefits include:

- | | |
|--|---|
| <ol style="list-style-type: none"> 1. Understand the potential risks from your extended supply chain. 2. Identify critical assets and any overreliance on single suppliers. 3. Assessment of suppliers' Cyber Security posture 4. Development of Audit processes 5. Assistance in choosing the most secure suppliers. | <ol style="list-style-type: none"> 6. Develop an effective supply chain review process. 7. Help protect the critical information you share with suppliers. 8. Continuous improvement as your supply chain evolves. 9. Ensure Secure by Design principles are implemented by suppliers |
|--|---|

Our list of services:

- | | |
|---|--|
| <ol style="list-style-type: none"> 1. Gain active assurance that suppliers are protecting your data. 2. Reduce the risk of information security incidents. 3. Standardised assessment methods ensure consistent approaches to measuring supplier risk. | <ol style="list-style-type: none"> 4. Compliance with legal and policy requirements. 5. Enable informed decision making when selecting new suppliers. 6. Identify suppliers who fail to meet your cyber security baseline. 7. Build trust within your supply chain |

Our security services

SA Group's specialist cyber team can be brought in at any stage of the project to advise and assure on:

- Security strategy
- Security risk management
- Security design
- Security architecture
- Cyber security consultancy
- Security testing
- Security incident management
- Security audit services

A fully managed, independent service

It is important to continually monitor and review the risk environment to ensure that any changes within your organisation that may evolve into risks are detected. The processes that are put in place need to be managed and evaluated on a regular basis to maintain compliance and ensure that your risk mitigation programme supports your Cyber Strategy and decision making.

About SA Group

SA Group is a Cyber Security, P3M and Technical consultancy working in critical Public Sector and Commercial markets. We specialise in helping customers scope and deliver against challenges within increasingly complex digital environments.

We provide professional consulting services to help solve critical challenges and navigate through complex change. Many of these tasks are highly technical, and we specialise in providing the expertise required on a flexible basis.

Our success is driven by the reputation of our people, a collegiate and agile approach to the requirements, and our determination to deliver value to our clients. Working collaboratively with customers, we use innovative digital technology, taking advantage of current and emerging trends, cyber security, and the design, implementation, and support of critical IT and communications infrastructure.
