

Softcat G-Cloud AWS Pricing

Pricing Calculator

G-Cloud customers can calculate the estimated hourly or monthly costs for using Azure utilising AWS Pricing Calculator - <https://calculator.aws/#/>

This calculator will show costs for products, example scenarios, saved estimates and provides an FAQ to support customers through the calculator

AWS Pricing Calculator

Estimate the cost for your architecture solution

Configure a cost estimate that fits your unique business or personal needs with AWS products and services.

Create an estimate

Start your estimate with no commitment, and explore AWS services and pricing for your architecture needs.

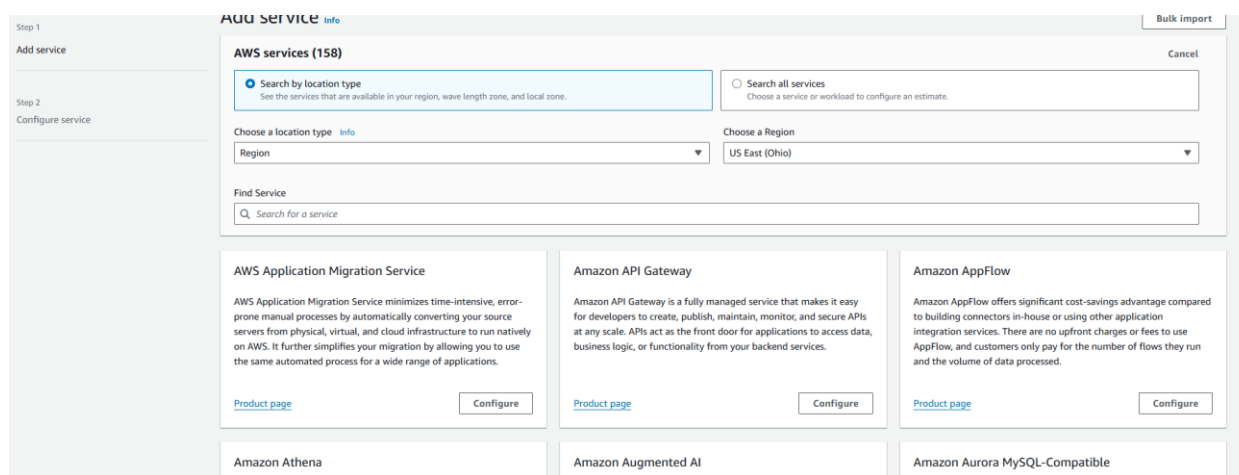

Sign in for personalized estimates

Use public pricing calculator without signing in.

Create estimate

Log into the AWS console to estimate your cost including your volume discounts. [Learn more](#)

Find Service

AWS Application Migration Service

AWS Application Migration Service minimizes time-intensive, error-prone manual processes by automatically converting your source servers from physical, virtual, and cloud infrastructure to run natively on AWS. It further simplifies your migration by allowing you to use the same automated process for a wide range of applications.

Amazon API Gateway

Amazon API Gateway is a fully managed service that makes it easy for developers to create, publish, maintain, monitor, and secure APIs at any scale. APIs act as the front door for applications to access data, business logic, or functionality from your backend services.

[Product page](#) [Configure](#)

Amazon AppFlow

Amazon AppFlow offers significant cost-savings advantage compared to building connectors in-house or using other application integration services. There are no upfront charges or fees to use AppFlow, and customers only pay for the number of flows they run and the volume of data processed.
