SOURCE OF SUCCESS

Why choose monday dev

Built on the monday.com platform, monday dev frees teams from the rigid constraints of traditional software management.

Embrace total flexibility

- ✓ Work in Scrum, Kanban, no admins needed.
- ✓ No training needed—onboard in hours, not days.

Gain full visibility

- ✓ Flag and resolve delays in real-time.
- ✓ Connect departments on engineering progress.

Adopt an all-in-one solution

- ✓ Get all your core capabilities in one subscription.
- ✓ Simplify financial planning and cut overheads.

Out-of-the-box solutions for engineering at scale

Feature request

Product roadmap

Sprint management

Bug tracking

Incident management

Sprint retrospectives

Product documentation

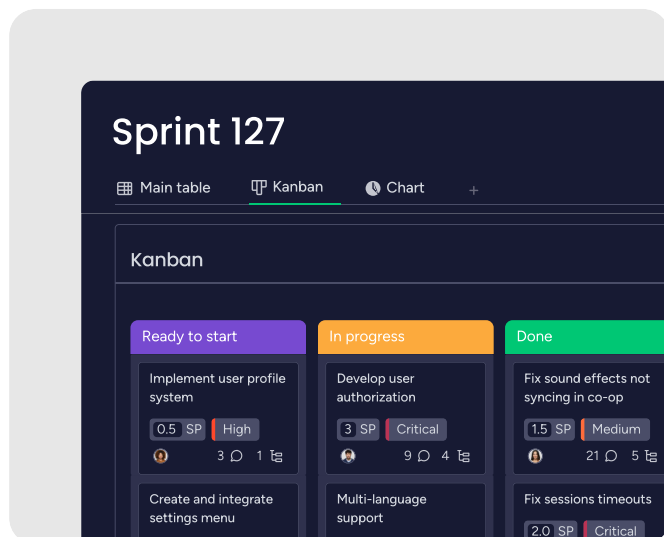

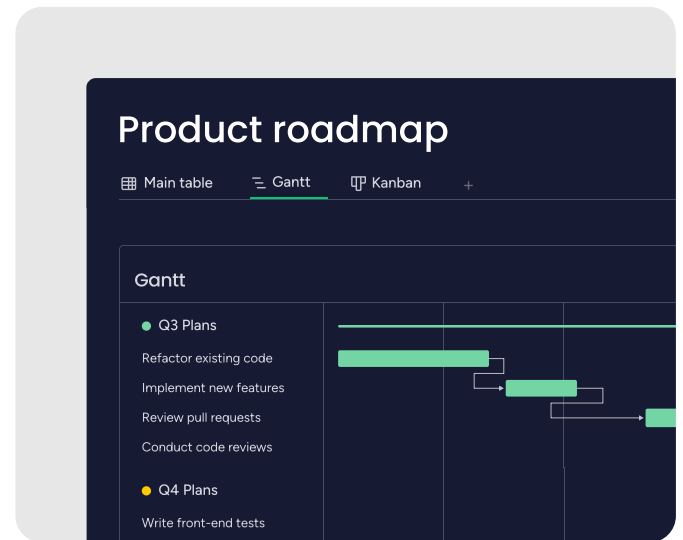

Release management

Center your roadmap on customer needs

- ✓ Customer feedback
- ✓ Feature prioritization
- ✓ Roadmap visualization

Prioritize your roadmap to focus on high-impact features for your customers by collecting requests and research data.

Run efficient, fast-paced sprints for your team

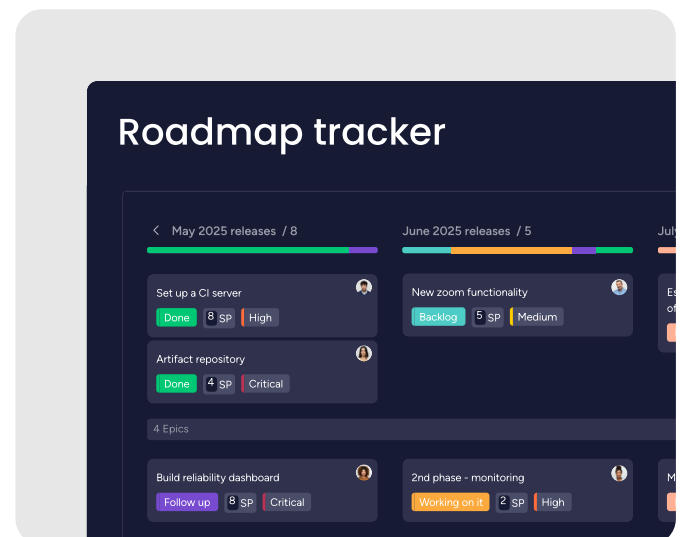

- ✓ Scrum and Kanban boards
- ✓ GitHub, GitLab & CircleCI integrations
- ✓ Sprint automations

Drive development forward without friction with flexible workflows, sprint automations, and integrated CI/CD tools.

Connect all teams for smooth product launches

- ✓ Shareable release plan
- ✓ Roadmap tracker
- ✓ Product documentation

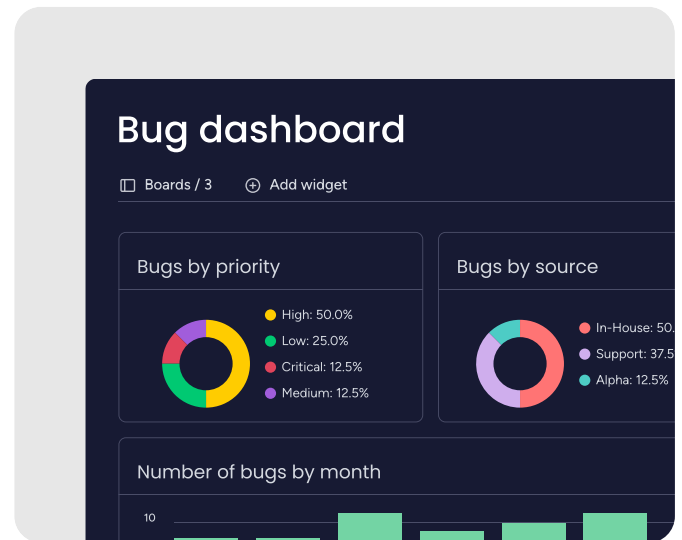

Sync product and engineering with client-facing teams on feature releases to ensure successful rollouts.

Flag and resolve product issues rapidly

- ✓ Bug reporting flow
- ✓ Incident monitoring
- ✓ Bug tracking

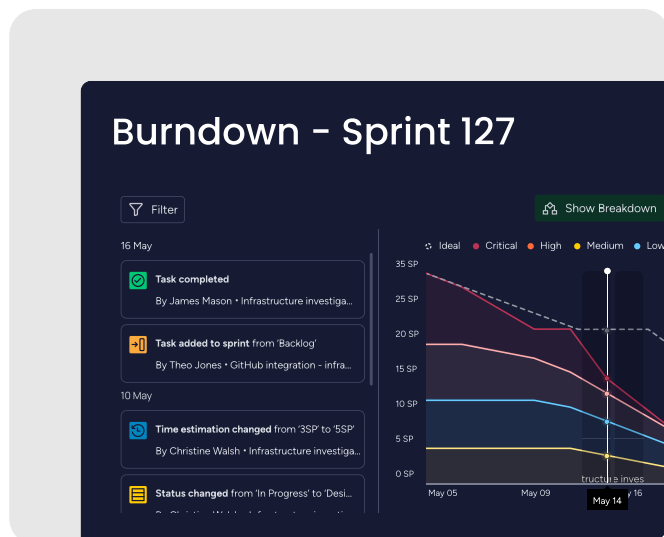

Track and manage real-time bug and incident reports to identify issues, respond fast, and retain customers.

Enhance engineering performance

- ✓ Burndown charts
- ✓ Sprint retrospectives
- ✓ Velocity tracker

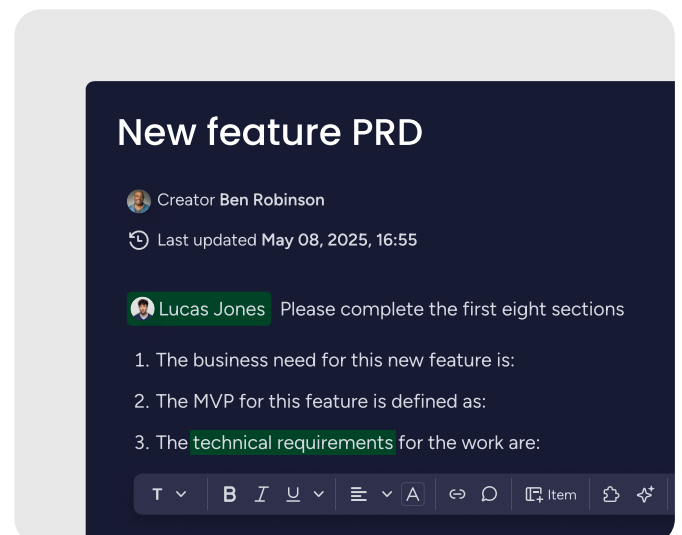

Access Agile insights and engineering metrics to identify bottlenecks, improve planning, collaboration, and productivity.

Create product wikis to share knowledge

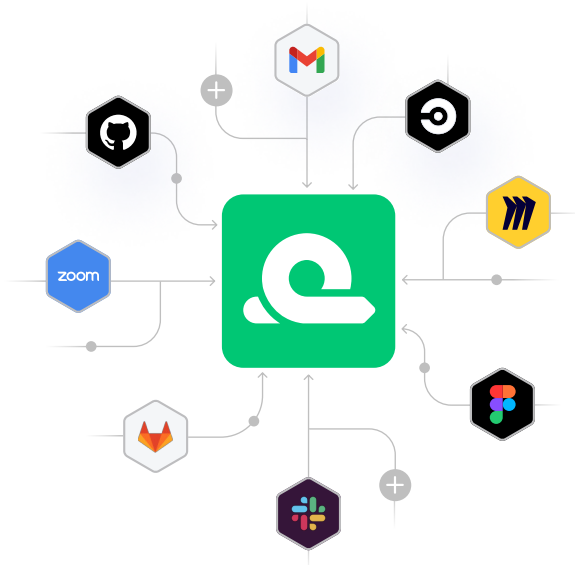

- ✓ monday workdocs
- ✓ Item level updates
- ✓ Item overview

Write and share searchable product docs to ensure full transparency between engineering and client-facing teams.

Connect everything

Integrate over 200 tools from your development stack in one centralized platform.

Tailored to your entire engineering team

Engineering leaders

Manage multiple teams and scrums on customizable dashboards. Track cross-team progress to meet company goals.

Software engineers

Focus on coding and engineering work. Using fast automation, update colleagues on statuses and flag bottlenecks.

Product managers

Prioritize high-value client requests. Sync engineering and client-facing teams on delivery timelines to ensure reliable timelines.

Design and data

Integrate analyst and product design work directly into core engineering workflows to collaborate fully on tasks.

Run faster with AI

Automatic bug categorization

Analyze each bug report as it is submitted. Triage and notify engineers of new tasks in their queue.

Instant document summaries

Evaluate PRDs and extract key information. Display this summary in tasks to give team member context.

Immediate task assignment

Automatically categorize new requests, and assign ownership by team—design, engineering, or product.

★★★★☆ 4.7/5

Backed by G2 customer reviews

- ✓ Fast deployment
- ✓ Intuitive & customizable
- ✓ 24/7 Customer support

“

monday dev's flexibility lets us create structure. Each team sets their own workflows, while I have full visibility.

15% increase in quarterly dev throughput

Matt Andrus - Chief Technical Officer

enterprise-grade protection

- ✓ IP Restrictions
- ✓ SCIM Provisioning
- ✓ Google & Two-Factor Authentication
- ✓ Multi-Region Data Centers
- ✓ Multiple SSO Providers
- ✓ Multi-Level Permissions
- ✓ Advanced Admin Controls
- ✓ 99.9% Uptime SLA
