Agentic Process Automation System

We Automate What Others Avoid

Combine and orchestrate goal-driven AI agents, RPA, APIs, and human expertise in one unified platform to conquer enterprise workflows others won't touch.

Why we lead

- ✓ **Agentic solutions** enable seamless human-agent collaboration across every business function.
- ✓ **Process Reasoning Engine (PRE)** powers intelligent decision-making. It learns, adapts, and coordinates agents fueling scalable, resilient automation.
- ✓ **Mozart Orchestrator** connects AI agents, automations, documents, and APIs in a single unified composer to run fully governed dynamic workflows, with no context switching.
- ✓ **Agentic execution** deploys in your VPC for complete data control, compliance, and seamless enterprise integration at cloud scale.

All-in-one ease. Out-of-the-park outcomes.

The Agentic Process Automation Systems combines automation and artificial intelligence (AI) to create automated systems that can almost think and act like humans, handling tasks that are complex and need brainwork. These self-driving workflows are not just following instructions; they're adapting, learning, and getting smarter as they go.

Think of the Agentic Process Automation System as AI's brainpower with automation's muscle, integrating agentic AI agents, machine learning, process orchestration, RPA, APIs, and natural language interfaces with enterprise-grade governance and security.

Automation Anywhere's Agentic Process Automation System is recognized as the top choice for AI and automation. It works safely and responsibly with any application, team, environment, and data. With our system, the barriers between people, apps, and processes dissolve, making work faster and easier so you can achieve more right away.
