

Datadog for UK Public Sector

Real-Time Insights to Support Digital Public Services

Datadog Overview & Product Offering Datadog is a unified observability and security platform that helps UK public sector organisations operate reliable, secure, high-performing digital services. With 1,000+ integrations, Datadog brings together telemetry from infrastructure, applications, networks, and security signals across the modern and legacy technology stacks used in UK government, healthcare, education, and local authorities. This full-stack visibility enables digital, service delivery, and IT teams to maintain availability for citizen-facing services, resolve incidents more quickly, and optimise IT operations across cloud, on-premises, and hybrid environments.	Compliance Readiness Datadog is certified to ISO/IEC 27001, with certification issued by an accredited certification body, supporting use in UK public sector and regulated environments. Datadog also maintains CSA STAR Level 1 and PCI DSS certifications for applicable services and environments. The platform supports compliance with UK GDPR and the Data Protection Act 2018, and enables secure-by-design and Zero Trust approaches that are consistent with guidance from the UK National Cyber Security Centre (NCSC), across cloud, on-premises, and hybrid environments.
Datadog's UK Presence • UK operations headquartered in London, supporting customers across government and regulated industries • Dedicated UK public sector sales, solution engineering, and customer support teams • Long-term investor and employer in the UK technology ecosystem • Publicly traded global technology company (NASDAQ: DDOG)	Analyst Recognition Datadog is consistently recognized as a Leader by independent analysts, including: • 2025 Gartner® Magic Quadrant™ for Observability Platforms (5 consecutive years) • 2025 Gartner® Magic Quadrant™ for Digital Experience Monitoring (2 consecutive years) • The Forrester® Wave™: AIOps Platforms, Q2 2025
Public Sector Experience Datadog is trusted by over 32,000 organizations globally, providing the scale and operational maturity required to operate large, complex environments. In the	

public sector, Datadog supports organizations operating highly regulated, mission-critical systems as they modernise services, improve operational resilience, and adopt cloud and hybrid architectures, including: • State and local government organisations supporting shared services, citizen-facing platforms, and critical infrastructure • Large public universities and education systems operating hybrid, on-premises, and cloud environments at scale • Public sector agencies and bodies with high requirements for availability, security, auditability, and compliance	Partners & Alliances Datadog partners with authorized public sector distributors and leading cloud providers to enable compliant procurement and long-term agency operations, including SoftCat, Computacenter, CDW, and Specialist Computer Centres.
