

Thales's Imperva Application Security G-Cloud 15 Pricing Scenarios

Introduction

Imperva Cloud Web Application Firewall (WAF) can be purchased in a number of different combinations, dependent on technical requirements and varying dependencies.

To provide pricing for G-Cloud 15, we've used indicative scenario-based pricing for the Imperva solutions and associated services. Engage Softcat and Thales for pricing which aligns with your technical requirements. All pricing is based on the annual cost.

Scenario 1

Small & Medium Enterprise: \$22,985 (per year)

Scenario 1 includes the Imperva Cloud WAF with **10mbps of clean monthly bandwidth and 5 additional sites**, and premium support from the Imperva Enterprise Services team (Datasheet linked).

Pricing Caveats

- Bundle variations are available and will be based on individual requirements.
- Additional Bandwidth and sites are available in increments of 1, and 1 site is included in the base plan.
- Minimum 12-month commitment term

Scenario 2

Mid-Market: \$78,060 (per year)

Scenario 2 includes the Imperva Cloud WAF with **50mbps of clean monthly bandwidth and 25 additional sites**, and premium support from the Imperva Enterprise Services team (Datasheet linked).

Pricing Caveats

- Bundle variations are available and will be based on individual requirements.
- Additional Bandwidth and sites are available in increments of 1, and 1 site is included in the base plan.
- Minimum 12-month commitment term

Scenario 3

Enterprise: \$145,700 (per year)

Scenario 3 includes the Imperva Cloud WAF with **100mbps of clean monthly bandwidth and additional 50 sites**, and premium support from the Imperva Enterprise Services team (Datasheet linked).

Pricing Caveats

- Bundle variations are available and will be based on individual requirements.
- Additional Bandwidth and sites are available in increments of 1, and 1 site is included in the base plan.
- Minimum 12-month commitment term
